ALLEGED FLOOD MENACE ON JELLISON PROPERTY PROVES TO BE CIVIC IMPROVEMENT

Filling in Ravine on Boynton Street Is for Purpose of Constructing Culvert Across the Property to Outlet to Control Situation

NEIGHBORS UNDERSTOOD THE PURPOSE

Arroyo Carrying Little Water to Be Returned to Old Creek Bed and Any Flood to Be Diverted to the City Culvert at the Lower End of Property

Reported contemplated injunction by the city against E. V. Jellison, to restrain the latter from filling the ravine on his property, 1234 South Boynton street, under allegations of possible flood menace to adjacent property, astonished Mr. Jellison and his neighbors yesterday.

None of his neighbors had objected to the filling, which has been going on systematically for more than a month. None, according to Mr. Jellison, had requested the city to interfere with Mr. Jellison's plan of improving his land and the vicinity of his property. The action of the city in threatening an injunction came without notice or demand, according to Mr. Jellison.

PLAY COSTUMING IS PLANNED BY TUESDAY CLUB

Business Session of Drama Section Held at the Fred Abbey Home

At the business session of the drama section of the Tuesday Afternoon club, which met Friday afternoon at the home of Mrs. Fred Abbey on North Central avenue with Mrs. R. E. Chase, curator, in charge, arrangements were made for the costuming of the play, "Women of History." This is to be given as the opening program for the new club home. Mrs. Chase was given authorization to purchase the stage equipment. It was recently decided that the drama section would have charge of furnishing the stage and also the stage curtain. Plans and specifications from various firms were submitted and the specifications from Flagg & Co. were accepted.

After the business meeting articles were read regarding the new Broadway productions, including "Rain" (Maubant), Mrs. Chase gave a reading of the play "The Green Goddess" (William Archer), in which George Arliss is soon to appear at a Los Angeles playhouse. This was followed by a social hour, during which delicious refreshments were served. Mrs. Ray Galvin assisted Mrs. Abbey as hostess.

GLENDALE POST AIDS TUJUNGA INSTALL

Report Royal Treatment by the New Unit in the Foothills

Thursday evening quite a large group of members of the Glendale Post, American Legion, went to Tujunga to participate in the installation of officers of that post. It proved a wonderful party. The Glendale representatives were royally treated and were entertained with a big supper, following the installation. They were accompanied by members of the Glendale Auxiliary, who were guests of the Tujunga Auxiliary.

ALLEGED BURGLAR ARRESTED
C. B. Shaw, address not known, was arrested at the corner of Brand and Broadway at 12:45 o'clock this morning by Officer Claxton. He was taken to police station, where he was booked on a charge of burglary. His cash bail was set at \$500, pending his hearing before Judge Lowe this morning.

THE WEATHER
Southern California: Tonight and Sunday, fair.
Los Angeles and vicinity: Fair tonight and Sunday with moderate temperature.

CLASSIFIED SATISFIES

J. F. Mars, 1215 E. Harvard, had 2 1/2 dozen chickens for sale. He advertised them in the Press want ads. He had 3 callers last night. He sold them at 10 p. m. He had 2 callers this morning before he was out of bed.

Nuff Sed!

NOTHING TO GAIN, MUCH TO LOSE

Consolidation "dumb bells" think that Los Angeles is really "a city of the angels." Nevertheless we are well pleased to have our clean, progressive home city of Glendale stay independent of the larger metropolis.

Nothing to gain and much to lose.

S. W. HUNTINGTON,
1301 Kenneth road, and
three votes against consolidation.

SO SAY WE ALL OF US—GLENDALEANS—

I say—Keep It Glendale, and be "proud as a peacock."
MOLLY E. BRODE,
204 E. Park Ave.

KIWANIS IS OPENED BY FERGUSON

Don Webb Rewarded for His Work As Secretary and Attendance

PASADENA RALLY

Meeting of Jan. 19 Is Omitted to Take Advantage of Dance

BY W. L. TAYLOR

Yesterday's luncheon meeting at the Broadway Cafe was devoted to a business meeting, which resulted in the clearing up of all unfinished business, the appointment of heads of committees by President A. L. Ferguson and a mapping out to some extent of the work for the coming year of the club. The Kiwanis Club members are an exception to the rule when it comes to eating and transacting business at the same time. They can do both, as was evidenced yesterday.

President Ferguson took the reins of government as though he was an old and thoroughly seasoned Kiwanian, and the routine business was conducted with dispatch and was devoid of that monotony usually incident to such occasions.

A great year is ahead for the Glendale Kiwanis Club, and President Ferguson and Secretary D. H. Webb, backed by a five board of directors, will surely keep the Glendale Kiwanis Club on the map.

Announcement was made that the Board of Directors had unanimously named Don Webb as secretary for another year, and that in appreciation of the splendid work he has done had voted him \$50. Mr. Webb has made a fine secretary and has given much time to the work of the club. He was one of the few members who could claim 100 per cent attendance during the past year. The average attendance of members for the past year was 87 1/2.

An event looked forward to with great interest is the charter night meeting of the Lankershim Club, which for want of room will be held in the Masonic Temple at Pasadena, Thursday evening, January 25. A big night is anticipated and Glendale is invited to attend in a body.

Mike Berman has responded to "the call of the wild," and will leave shortly for Europe, where he expects to remain for several months. Mike has a few relations he wants to visit while across the pond.

Fred Deal reported that a thriving Kiwanis Club has been organized at San Fernando. Fred is organizer for the Kiwanis and is organizing clubs throughout this section.

On Friday, January 19, the regular noon luncheon will be omitted in Glendale, and instead the club will enjoy a supper and dance at the Sunset Canyon Country Club, beginning at 6:30 p. m. This is promised to be a big event and every member is urged to go. Harry Girard was placed in charge of the entertainment for that night, and Fred Deal will see to it that the eats and other fixings are up to the standard. Harry promises to put on a program that will be a hummer, and he knows how to do it.

That the Kiwanis Clubs are able to accomplish great good is evidenced on every hand. A letter read by Secretary Webb yesterday contained the information that the Los Angeles Kiwanis Club had raised \$20,000 toward building the McKinley Boys' Home, and that the club fully intends to raise enough to complete its undertaking. Harry Girard stated that a big entertainment is now under way to be given in Los Angeles for the benefit of the fund, and that Glendale Club would be given credit for this entertainment's efforts.

Committee heads were named as follows: House committee, Bert Perry; Classification Committee, Lyman P. Clark; laws and regula-

18TH ANNIVERSARY OF GLENDAL W. C. T. U. IS MARKED BY RECEPTION

Held at Residence of Mrs. G. H. Rowe, With Mrs. Hester Griffith Miller As Speaker of the Day Discussing Sidelines of Work

FORCED REFORMS AT SAN QUENTIN PEN

Decide to Hold All-Day and Evening Regional Conference on February 9, at Which County and State Officers Would Present Plans for the Year

That leaders in the W. C. T. U. have been doing constructive work on lines only indirectly connected with their great endeavor to banish alcohol was proved by some of the experiences related at the meeting of the local union held at the home of Mrs. G. H. Rowe Thursday afternoon, when Mrs. Hester Griffith Miller was the speaker. It was a day set apart to honor new members, but it also celebrated the 18th anniversary of the union of which Mrs. Miller had been the organizer.

She told how she had been drawn to the W. C. T. U. by her admiration for Frances Willard and the happiness she had found in acquainting herself with its various departmental activities. She had found of absorbing concern work among prisoners. Several incidents of real heart interest where she had been able to help the men and women with whom she thus came in contact were related and there was a humorous touch or two as she mentioned cases in which her confidence was betrayed—the prisoner whom she took into her home and who stole all her silver except her silver spoon, and the prisoner who borrowed money for railroad fare which they never repaid. Nevertheless the good outweighed the bad and she never regretted the efforts she put forth to help the down and out. She became the confessor to many who were heart hungry for some one in whom they could confide. That they might never be betrayed by her she schooled herself to forget what they told her as soon as possible that if questioned she might truthfully say she did not remember.

Speaking of this phase of her work she said: "I used to say to them, 'I have come as a messenger to tell you that you should forget the past.' That is the reason I am not more of a historian. I do remember, however, the personality of your first president, Mrs. Hendershot, how faithfully she performed her duties and how we all loved her. I never have forgotten, of course, Mrs. Brown, who is still 'old faithful.' When we had any social meetings Mrs. Brown was never missing. Do not be afraid if you are shoved into work doubting your own ability. Even if you do not go ahead as you think you should, keep going. But for the knowledge and experience I gained as a member of the W. C. T. U. one of the worst matrons in the whole state of California who was in our state penitentiary might still be there. She had been there 14 years. I learned about her during my prison work. I collected evidence and then went to the warden and told him he must discharge her, that back of me was this big organ, and then she was club women of California. We had the story all ready to publish if he refused. I wish you could know the transformation that has been wrought in the women's department in San Quentin. Your speaker could never have brought it to pass without the W. C. T. U. organization to back her, and with-

out the organization she would never have entered the prison work."

At the business session which preceded the address and over which Mrs. Ruby Smart in her usual tactful way presented, the union voted to hold an all-day and evening regional conference Friday, February 9, at which county and state officers would be present to explain the work they wished to have pushed during the year and the manner in which it should be carried on.

A pleasant feature of the meeting was the presentation of a copy of the year book of the county W. C. T. U., the first ever published and made possible through the energy and business ability of the county president, Mrs. Marie Yeoman, with the assistance of her fellow officers. Mrs. Yeoman is a member of the local union and is present. The books were received with many expressions of pleasure and she was honored with a vote of thanks.

The new members present were introduced to Mrs. Yeoman who gave them a word of greeting, calling their attention to the campaign for new members which is being conducted to swell the national enrollment to one million by 1924. As a means of securing it, all unions are being urged to double their membership. This will be accomplished here if the county enrollment is raised to 6000. The new members, and then all the members, repeated the W. C. T. U. pledge and the song, "Win a Million Members" was sung.

Mrs. Miller was given the white ribbon salute and this ended the session except that the chairman of the flower mission department was asked to send a note and flowers to C. W. Ingledue, who is an honorary member and who is ill. Announcement was made that the theme of the next meeting would be "Temperance in the Mission Fields," that representatives of the various missionary societies would be speakers, and the meeting would be held at the home of Mrs. Ingledue, 501 East Wilson avenue.

Mrs. Thomas, the treasurer, made a statement of the finances of the union supplemented by a little talk on the county budget by Mrs. Yeoman. Adjournment followed the singing of "Work for Enforcement," and prayer by Mrs. Miller. Tea and cake were then served by the hostess.

LEGION ACTIVITIES IN AND AROUND THE CITY

To Meet With Eagle Rock and Play Pomona Post in High Gym

Next Friday a joint meeting of the Glendale and the Eagle Rock posts of the American Legion and of the auxiliaries connected with both will be held for the purpose of promoting cordial relations between the organizations.

Next Wednesday a Legion basketball game will be played by the teams of the Glendale post and the Pomona post in the boys' gym of Glendale High. This time the local players expect to win.

The executive committee of the Glendale post will meet Tuesday evening to discuss a program for the coming year.

M. Brown, Wm. Hooper, N. C. Hayhurst, E. E. Gordon, C. J. Hatz, E. E. Wilson, W. G. Lauderdale, L. P. Clark, Chas. F. Stuart, Tom Purst, A. L. Ferguson, S. Berman, Bert Berry, Harry Girard and son Louis, A. N. Fairchild, W. H. Reeves and O. W. Andressen.

Kiwanians and visitors present were: E. P. Hayward, D. G. McCartney, Dr. Jack Anderson, H. Nelson, D. H. Webb, Ed Radke, Cam Thom, Ray Galvin, Bill Bode, Frank Echols, Dr. Luckock, Fred Deal, Ray Bentley, Wm. C. Page, Sid Brown, W. L. Truitt, Burton McGinnis, H. M. Parker, E. H. Harrington, W. T. Hurt, A. L. Baird, Spencer Robinson, W. L. Taylor, Art Sherburne, H. M. Kuhn, Harry McBain, E. O. Kiefer, E. W. Taylor, M. D.; Edgar Swift, M. D.; R.

ARE THE FIREMEN ON THE JOB? WE WILL SAY SO!

3 Minutes After Alarm Have Hose Stretched to Press Building

Three minutes after the alarm was turned in, shortly before 7 o'clock last night, the Glendale fire department had a hose ready for action at the Glendale Press office. The apparatus came like a flash of red lightning out of the house to the Press.

It was a false alarm, however. Someone had placed several sticks of wood in the stove in the city room on the second floor. The smoldering of this wood, after all the newsgatherers had left filled the room with smoke. This filtered out of the windows and caused other employees of the Press to think the building was on fire. An alarm was turned in and the boys of the department came on the jump.

Notwithstanding the fact that the fire could not have caused any damage, the main thing demonstrated was the swift action of the Glendale fire department. Had there been a real fire it would have been caught in its first flare up and smothered with action.

At the business session which preceded the address and over which Mrs. Ruby Smart in her usual tactful way presented, the union voted to hold an all-day and evening regional conference Friday, February 9, at which county and state officers would be present to explain the work they wished to have pushed during the year and the manner in which it should be carried on.

A pleasant feature of the meeting was the presentation of a copy of the year book of the county W. C. T. U., the first ever published and made possible through the energy and business ability of the county president, Mrs. Marie Yeoman, with the assistance of her fellow officers. Mrs. Yeoman is a member of the local union and is present. The books were received with many expressions of pleasure and she was honored with a vote of thanks.

The new members present were introduced to Mrs. Yeoman who gave them a word of greeting, calling their attention to the campaign for new members which is being conducted to swell the national enrollment to one million by 1924. As a means of securing it, all unions are being urged to double their membership. This will be accomplished here if the county enrollment is raised to 6000. The new members, and then all the members, repeated the W. C. T. U. pledge and the song, "Win a Million Members" was sung.

Mrs. Miller was given the white ribbon salute and this ended the session except that the chairman of the flower mission department was asked to send a note and flowers to C. W. Ingledue, who is an honorary member and who is ill. Announcement was made that the theme of the next meeting would be "Temperance in the Mission Fields," that representatives of the various missionary societies would be speakers, and the meeting would be held at the home of Mrs. Ingledue, 501 East Wilson avenue.

Mrs. Thomas, the treasurer, made a statement of the finances of the union supplemented by a little talk on the county budget by Mrs. Yeoman. Adjournment followed the singing of "Work for Enforcement," and prayer by Mrs. Miller. Tea and cake were then served by the hostess.

BOY SCOUTS' BUDGET IS WORKED OUT

To Cover Two Years' Activity As a Basis of Calculation

A tentative two-year budget for the Verdugo hills district council, Boy Scouts of America for 1923-24, has been worked out by a special committee consisting of Peter L. Ferry, Glendale; Emil F. Swanson, Eagle Rock; Leo L. Lang, Tujunga; and Dr. A. E. W. Yale, Burbank. The committee met Friday noon at the Glenn Inn and at the conclusion of the conference they had made a complete survey of the needs of the Scout council for the next two years.

Commenting on the meeting Mr. Ferry, who is its chairman, stated that "the committee had decided to recommend a two-year budget, rather than for just one year, as the expense for putting over one campaign for two years would not cost any more than it would for a single year."

The recommendations of the special committee will be made public at the annual meeting of the council scheduled for Friday evening, January 12, in the banquet hall of the Citizens' building.

INVESTIGATION OF SCHOOL STATISTICS CONTINUES

Superintendent White Attends Hearing at Mark Keppel's Office

Superintendent R. D. White, who is one of a committee of ten appointed by the California Teachers' association, Southern section, to investigate the sensational figures published by the county grand jury relative to the cost of public schools in Los Angeles county, based on statistics furnished by the county auditor, attended a 3-hour hearing Friday afternoon in the office of County Superintendent Keppel, which will be followed by other hearings at which all persons in any way connected with the subject under investigation will be asked to appear before the committee. It is expected the investigation will be continued for two or three weeks. No information will be given out until the complete report is ready for publication and distribution.

WEST SIDE FOLKS

West Glendale Improvement association will hold its annual meeting at Columbus school, Tuesday, January 9, 8 p. m. Election of officers for the ensuing year and standing committees. All members are urged to attend as several subjects of importance to taxpayers will be discussed.

COMPLAINT DISMISSED

Harry Sloan of St. Louis and Frank Reese of Bakersfield, who were arrested Thursday night on a charge of stealing milk and rolls from homes on San Fernando road, were dismissed yesterday, after being questioned by Chief of Police Fraser.

BRAND IMPROVEMENT BODY OPPOSES CHARGE FOR LIGHTS AGAINST PROPERTY OWNERS

Resent Action of City Council Demanding Pay for Juice to Five Light Standards on the Thoroughfare From Individuals Holding Frontage

REVERT TO THE OLD CONTRACT WITH CITY

Committee Is Appointed to Deliver Protest to the Councilmen at the Next Meeting on Thursday and Will Attend in a Body

At a meeting of the Brand Boulevard Improvement association, held Friday night at 124 North Brand boulevard, with Mattison B. Jones, president, in charge, the matter of the proposed action of the city council compelling the property owners on Brand boulevard territory covered by the five-light standards to pay for the electricity used in the lights was discussed. The association went on record unanimously against this proposed action.

It was stated that in 1912 or 1913 the then trustees of Glendale agree with the property owners on Brand boulevard and Broadway that if the property owners at their own expense would install these five-light standards that the city would furnish the electricity thereafter. The association unanimously desires the present councilmen to maintain that contract entered into between the people and the city at that time.

A committee headed by Mr. Jones and also including O. A. Lane, John W. Lawson, Professor Chandler and Charles Damerell will present the protest of the association to the city council next Thursday night at the regular weekly council meeting. The association then adjourned to meet at 7 o'clock next Thursday night preparatory to going to the city council.

One Ordinance Says 8 Feet Limit, Another 12, A 3d Says 'Tax Them Out'

Is Glendale going to permit billboards to be erected within her borders or is she not?

On the strength of an ordinance passed by the city council a few days ago the T. D. & L. Theatre has started the erection of an artistic billboard 12x48 feet in size at the northeast corner of Brand and Cerritos. A permit to erect this board was granted by the Glendale building department.

Thursday night an ordinance was presented by Councilman Davis, which, if enacted, will place a tax of one dollar per square foot on any billboard erected and maintained in Glendale, in addition to a building permit to cost two dollars. This would place a tax on the board that is being put up by the T. D. & L. Theatre of \$576 per year.

The billboard ordinance in Glendale is in somewhat of a muddle. Up to the time of the passage of the existing ordinance there was a law in effect which prohibited boards over 8 1/2 feet from the ground to be erected. This was enacted as a result of a heated argument over the "score."

One or more applications were made to the council about two months ago for a permit to erect a board or boards having a height of 12 feet from the ground. An ordinance to this effect was prepared, but the council could not agree on its terms and it was temporarily laid aside. A few days ago this ordinance was resurrected and passed.

For some reason the council, notwithstanding the fact that it had passed the ordinance permitting a 12-foot board, apparently wishes to put a brake on the erection of such boards in Glendale. In order to do this it has under consideration the ordinance which will tax all such boards \$1 per square foot. This ordinance, it is understood, will be passed at the next regular meeting if present plans are carried out.

For some reason the council, notwithstanding the fact that it had passed the ordinance permitting a 12-foot board, apparently wishes to put a brake on the erection of such boards in Glendale. In order to do this it has under consideration the ordinance which will tax all such boards \$1 per square foot. This ordinance, it is understood, will be passed at the next regular meeting if present plans are carried out.

The officers to be installed include Mrs. Margaret Kaeding, president; Mrs. L. T. Rowley, first vice-president; Mrs. Ed Sullivan, second vice-president; Mrs. Charles T. Jones, secretary; Miss Josephine Emery, treasurer.

SAM BROWN IS ELECTED HEAD OF MEN'S CLUB

President of Men's Club of Tropico Presbyterian Church, Selected

Sam Brown of South Glendale was put to work last night as the new president of the Men's Club of the Tropico Presbyterian church. When the chair was turned over to him by retiring president H. E. Fry, Dr. James F. Winnard, pastor, took charge of the installation exercises. In addition to President Brown the following gentlemen took office: William Malcom, vice-president; Leo D. Hyer, secretary-treasurer.

President Brown appointed the following as committee chairman: Educational, Fred Dunford; religious, Dr. Harry St. Clair; social, H. C. L. Moody; entertainment, Henry Wilcox; publicity, Stillman Brown; membership, Fred C. Richardson; program, H. E. Fry. These gentlemen, with the vice-president and secretary-treasurer, will constitute the president's cabinet for 1923.

Some time was spent in discussion regarding plans for 1923, and a social half hour was enjoyed.

GO RABBIT HUNTING
Mayor Spencer Robinson and Councilman Lapham journeyed to the ranch of the latter in Palmdale today. They took with them the mayor's two greyhounds, "Slim" and "Lady." The day was spent in hunting jackrabbits.

CACHE OF STOLEN SILVER FOUND BY WHITE BOY

Playing Near Home, Son of John Robt. White Jr. Turns Up Loot

Silverware, which is supposed to have been stolen during one of the robberies in Glendale recently and hidden until the "score" has passed over, was found yesterday afternoon by a young son of John Robert White, Jr., while at play near his home at 347 North Orange street, according to police records this morning.

The articles found consisted of five teaspoons, five oyster forks, one fruit knife and one coffee spoon.

L. W. Ball 363 West Elk
Mrs. Harry Greenwalt 408 Oak
Mrs. F. M. Ryan 332 West Acacia
F. S. MacDougall 453 West Colorado
W. Q. Widdows Glendale Daily Press

Dr. Hannah Luella Hukill, 102 West California: "I am against annexation with a big 'NO'."

Mr. and Mrs. Wallace Robinson, 511 North Central avenue: "We are opposed to annexing Glendale to Los Angeles. Glendale has made wonderful progress as an independent city and we believe that it is best to let well enough alone."

Mr. and Mrs. W. D. Phillips, 1102 East California avenue: "We are opposed to annexation to Los Angeles, as we believe that Glendale would lose its individuality and would gain nothing."

"We are opposed to the annexation of Glendale to Los Angeles. It would be just as absurd as for a man owning a Chevrolet car allowing it to be hitched on the back of a big Pierce-Arrow. Everywhere the big car went the small one would have to be the tail end—and never could get loose."—J. S. and Carrie Hendrix, 1306 East Broadway.

AS YOUR CHILD SLEEPS

By H. ADDINGTON BRUCE

Author of "The Riddle of Personality," "Self-Development," Etc.
(Copyright, 1923, by The Associated Newspapers)

There is a hint of practical importance to parents in the well established psychological fact that suggestibility is heightened during drowsiness.

So true is this that many medical psychologists, with the aid of a metronome or other device producing a monotonous sound, make it a point to put patients into a drowsy, semi-waking, semi-sleeping state before giving them curative suggestions. It is their experience that suggestions then given are the more likely to be favorably received and acted upon.

In this way some astonishing cures of functional nervous and mental disorders have been effected. Also there has often been achieved a rebuilding of character, to the point it may be of enabling unfortunates to shake off vicious habits which have enslaved them.

Now, character strengthening is one of the first duties of parents. Often, too, parents are sadly perplexed, not merely by character weaknesses in their children, but by behavior peculiarities such as dread of the open or of the dark, talking or walking in sleep, nail-biting, etc.

Again and again it will be found possible to overcome these by following the example of the medical psychologists in utilizing the enhanced power of suggestion during drowsiness.

Suppose, for instance, one has a child so sensitive and timid that it dreads to go outdoors alone, even in broad daylight.

Every evening the mother of that little child, after first lulling it to drowsiness by singing softly to it, may well try the experiment of then beginning to suggest to it that it will be henceforth free from timidity. In the same crooning, monotonous tone of the lullaby, the mother can say to the child:

"Tonight, my little one, you will sleep soundly. Bad dreams will not trouble you. And in the morning you will wake refreshed and with greater courage. You will know that God is watching over you, and that when I send you outdoors you can go in perfect safety."

Over and over, in the same quiet way, these statements should be repeated every evening. Even if the child appears to have passed quickly from drowsiness to outright sleep, the conversational suggestion should be continued for ten to fifteen minutes, the voice being slightly raised as the sleep seems to deepen.

After a time, especially if care is taken during the child's waking moments to give it no suggestions that may tend to reinforce or increase its timidity, the ideas conveyed to it while it is falling asleep and after it has fallen asleep are pretty sure to bring the desired result.

The child, without knowing why, will be less oppressed by nervous fears. It will begin to go out unattended quite willingly. Soon, indeed, it may show an adventurousness and daring that none expected it would ever display.

Not a few parents who have kept abreast of modern psychological research in its bearings on child training can testify from personal knowledge to the value of this method of sleep-time suggestion. They can testify, too, that it is applicable to the solution of most varied parental problems. I shall have more to say concerning this another day.

BITUMINOUS STRIKE?

CHICAGO, Jan. 6.—After a two-day battle, miners and operators of the fifteen bituminous coal producing states failed to get together on a new agreement and the conference was expected to break up today.

The continental traveler deposited an enormous bag beside the door in the dining car. The conductor promptly rebuked him. "Don't you know you can't bring your luggage in here? You'll have to put that bag in the van." "Luggage," sneered the traveler. "That isn't luggage. That's my purse. I'm going to Austria."

Jewett salesmen are at your service. Phone Glen. 2096.—Adv.

Eight New Cardinals Named by Pope

Cardinal Touchet, Cardinal Bonzano

Among the eight new cardinals named by Pope Pius XI at the recent consistory were Monsignor Arthur Stanislaus Touchet, Archbishop of Orleans, France; and Monsignor Giovanni Bonzano, apostolic delegate to the United States, formerly stationed at Washington.

FIRST METHODIST ALL DAY MEETING IS SUCCESS

Mrs. Fanset Donates Nice
Crocheted Bedspread
to Ladies' Aid

The attendance at the all-day meetings at the First Methodist church Thursday was very large, covers being laid for 130 at the mid-day luncheon. It was the first one since Christmas. The Ladies' Aid of which Mrs. Charles Stanley is president, met in the morning and the foreign and home missionary societies in the afternoon.

One of the items of business taken up at the Ladies' Aid was consideration of methods of disposing of a beautiful gift to the society from Mrs. Fanset of Vine street, a handsome bedspread which she crocheted during the winter she spent in Illinois, and on which she put 300 hours' work. The decision reached was to place it in one of the department stores in Los Angeles for sale.

Mrs. Thomas, who was a missionary for 24 years in India, was the speaker at the foreign missionary meeting and talked upon the condition of women in that country. She is optimistic concerning the future of that land and expressed the opinion that the uprising there represents ambition for better things rather than revolution.

The meeting of the home missionary society was held from 3 to 4 p. m. and reports submitted to both societies were excellent.

Phone Glendale 2096 for a ride in the new Jewett.—Adv.

MORMON HISTORY TO BE SUBJECT OF LECTURE

Interesting Talk by Gus-
tave O. Larson at K.
of P. Hall, Jan. 10

An illustrated lecture on "Mormon History from the Beginning to the Present time," will be given at the K. of P. hall at South Brand boulevard and Park avenue, Jan. 10 at 7:30 p. m., by Gustave O. Larson. Of the Christian churches existing in the world at present, possibly no one has attracted so much attention internationally as the Church of Jesus Christ of Latter Day Saints, commonly called the "Mormon" church of Utah.

Vast amounts of literature have been distributed both for and against it. Pulpit and press have been equally active to the same ends. The story of its inception and growth to the now prominent position it takes among Christian religions is interesting.

Mr. Larson has been well received throughout California and Arizona. He not only promises to make his lecture interesting and educational, but he also promises that "truth shall be first and foremost." No admission will be charged.

THE WHOLE WORKS
HARRISBURG, Pa., Jan. 6.—John and Mary Stans have named their first son, born last month, United.

A Jewett will take you from one to sixty miles per hour.—Adv.

Glendale Church Services

GLENDALE PRESBYTERIAN

"Church of the Light Cross,"
Broadway at Cedar

Rev. W. E. Edmonds, Pastor

Rev. Louis Tinning, Asst. Pastor

The pastor will occupy the pulpit both morning and evening. At the morning hour of worship, 11 o'clock, his topic will be, "The Pattern Prayer," the church having selected for its motto for 1923: "Prayer Changes Things."

Evening service, 7:30; organ recital, 7:15. Sermon topic, "Substitutes."

Fully graded Bible school, 9:30 a. m.; men's Bible class, City Hall, same hour.

Christian Endeavor meetings at 3, 6 and 6:15.

Prayer meeting, Wednesday, 7:30 p. m.

Thursday Morning Bible Class for women, 10-11 o'clock, in the church. Un denominational and interdenominational. All women welcome.

Music for the Sabbath follows: Morning—Prelude, "Pastorale" (Yon); anthem, "The King of Glory" (Taylor) Miss Elizabeth Mottern, soprano; Mrs. Fannie Marple Retts, contralto; J. Maccomson Huddy, tenor; C. M. Books, bass; prayer response, "The soul that Clings to Thee" (Batisol); tenor solo, "The Homeland" (Hanscom); Mr. Huddy; gospel solo by Mr. Books; postlude, "March" (Volkmann).

Evening—Organ recital: (a) "Castilene Nuptiale" (Dubois), (b) "March Pontificale" (Tombelle), (c) "Slumber Song" (Schumann); quartet, "The Lord Hear These" (Lorenz); bass solo, "Judge Me, O God" (Buck), Mr. Books; offertory, "Evensong" (Reinecke); quartet, "Hour of Prayer" (Wilson); gospel solo by Mrs. Retts; postlude, "Melody" (Guilmant).

LATTER DAY SAINTS

PACIFIC AVE. METHODIST

Cor W. Harvard and S. Pacific

Announcement of Sunday services.

Church school—9:45 a. m.

11 o'clock worship, with sermon by the pastor on "Pleading Angels."

Epworth League, 6:30 p. m.

Evening service, 7:30. The minister will speak "Satan's Plan."

The Conners Trio is assisting the church and pastor in special meetings, and will give the following program of music:

Morning: (1) "Sing, My Soul, His Wondrous Love." (2) "Jesus Prayed in the Garden."

Evening: The 30-minute song service in the morning will be unique and inspiring. The Conners will sing a southern melody entitled "Steal Away Home." Mrs. Helen Conner-Nern will sing "An Evening Prayer." She will be heard in a pianolike reading, "Echoes of the Old Hymns." Mr. Conner will play "The Palms" on the trombone, and the trio will sing "The Royal Anthem."

TROPICO PRESBYTERIAN

The Sacrament of the Lord's

supper will be administered at the morning service and in connection with it, Dr. Winnard will preach on the theme, "Lord, It Is Good for Us to Be Here."

Subject of the evening sermon will be "Lead Us Not Into Temptation."

FIRST METHODIST EPISCOPAL

Next Sunday morning at the

First Methodist Episcopal church.

Mr. Rasmus will preach on the subject, "My Trust."

In the evening Dr. H. I. Rasmus Sr., will preach a sermon of interest to all, but particularly so to young people. His topic will be "Adrift."

Morning music:

Prelude: Meditation, (Cavocci); anthem, Te Deum (Dicks); Offertory, quartet, "I Heard a Sound of Voices" (Shelly), Miss Isgrig.

Dorothy Peart, Paul Butterfield and Frank Butterfield; postlude, Melody, (Witting).

Evening music:

Prelude, Offertory No. 3, (Bastiste); anthem, "Savior Like a Shepherd Lead Us" (Neidlinger); soprano obligato, Mrs. Peart; chorus and baritone solo, "List! the Cherub Host" (from the Holy City); solo, Mr. Haines; duet, (Witting), Mr. Dolberg and Dr. Lucas; postlude, "Song Without Words" (Tschalkowsky).

CONGREGATIONAL

CHURCH TO HOLD

MEETING

Next Wednesday evening will be an important one in the annals of the Congregational church of this city. At that time the annual meeting and dinner of the church will be held in the basement of the new church, and be the first occasion on which it will be used.

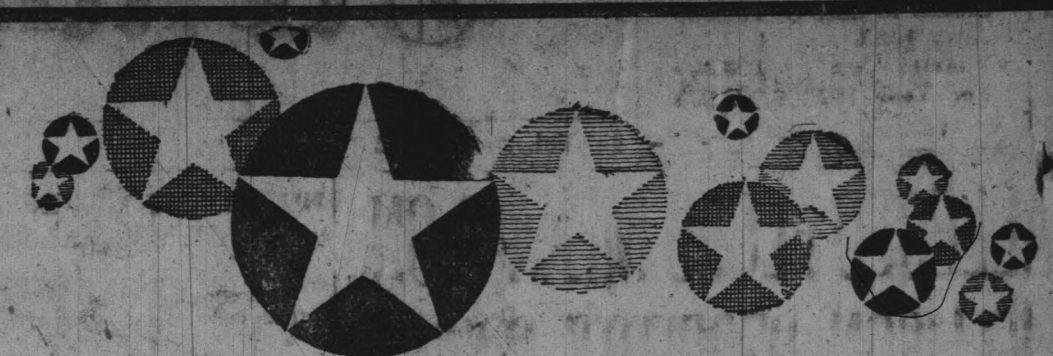

Reports of officers and committee chairmen who served during 1922, will be received, and officers for the coming year will be elected.

The dinner will be served at 6:30 by members of the Women's auxiliary. Following that date, Sunday services will be held in the basement until the church auditorium is finished and completely furnished, including the new \$3500 organ.

SOCIETY PIG

SAN FRANCISCO, Jan. 5.—The latest in society entertainers was creating a stir in San Francisco today. Its name is "Bacon," and it's a six-weeks-old pig, which Jack Van Camp and his wife have trained and are willing to rent to families whose children need an afternoon's entertainment.

Bacon gets a bath every day, has gilded hoofs and drinks its milk from a bottle.

HOME NURSING and HEALTH HINTS

ANCHORING THE THROAT COMPRESS

The man of the house was in a very miserable state of mind. He had a sore throat. He was sure that no one in the world had ever before had quite such an annoyingly painful throat.

He smiled skeptically, or tried to, when the doctor said "Cheer up, old man. I've been through it and know all about it, and, believe me, your throat hasn't got a patch on it compared to what mine had."

Certainly, he mused,

TRACK LOWERING MAKES RAPID PROGRESS

Contractors for P. E. Company Rushing Work to the Limit

The work of track lowering between Colorado and Garfield avenue is being pushed along with amazing rapidity by the contractor employed by the P. E. company to do the work. At the present rate of progress the excavating will be finished today and the laying of the new track by Monday evening. The more particular task of straightening and ballasting. All new steel and new cross-ties are being used. As soon as the new track is ballasted the cross-ties will be changed to divert all northbound traffic there, and the work of tearing up the east track will begin. The excavating on the west side has taken less than two weeks and prospects seem bright for complete new lowered tracks by February 1. The paving of the right-of-way will follow and then the old unsightly hump that has disfigured that portion of Brand boulevard will be a disagreeable memory.

PURELY PERSONAL

Mr. and Mrs. C. F. Smith of Lindsay, California, returned to their home Friday after spending a week as guests of their daughter, Mrs. H. R. Adams, of 153 South Pacific avenue.

Try them all, then try a Jewett. You will like it.—Adv.

Mr. and Mrs. John Norwood of Cabri, Canada, have been house guests for the past week of Mr. and Mrs. Frank Parr of 224 South Orange street, and contemplate making their permanent home in Glendale.

Speed, power, on the getaway and durability, are all Jewett features.—Adv.

Mrs. Adolph Englehart of the Ramsey apartments has returned from San Diego, where she had a delightful New Year's visit with her nieces, Mrs. H. C. Arnold of Normal Heights and Mrs. Frederick Winstone of Kensington Park.

Why take a chance on power? Buy a Jewett.—Adv.

Mr. and Mrs. Max Wyman, of Seattle, are expected to arrive in Glendale today or tomorrow and will be guests of Mr. and Mrs. Frank Parr, of 224 South Orange street.

There are some prettier but none better than the Jewett.—Adv.

Mrs. William Hunter of East Los Angeles, Mrs. Frank Parr, of South Orange street, attended the "Jinks day" luncheon given by the Women's University club at the Hibel club house in Los Angeles today.

The home of the Jewett is at 308 W. Colorado.—Adv.

Norval Etting of Grand Island, Neb., has been spending several days with his brother, Lee Etting, who is now domiciled at the Elks' clubhouse. He had intended to start for home Monday, but Glendale's charms will hold him for another month and maybe land him as a permanent resident.

A Jewett touring car sells for \$1195 in Glendale.—Adv.

Dr. and Mrs. C. A. Brandstater and son Kenneth have returned from a holiday motor trip in which they visited friends in Visalia and Modesto, also their son Oliver Brandstater who is receiving clerk in the warehouse of the Great Western Power Company of San Francisco.

Ask any Jewett owner or phone Glen. 2096.—Adv.

Mr. and Mrs. Claude Case of 343 North Maryland avenue will entertain at dinner tonight Mr. and Mrs. Otis Ivey and daughter Helen of Los Angeles.

Mr. and Mrs. Earl Jewett of Glendale are guests over the weekend at the home of Mrs. Jewett's brother-in-law and sister, Mr. and Mrs. D. H. Flanders, of 4117 Regatta street.

Mrs. R. D. Angelica and Mrs. A. Augustin of East Raleigh were guests at tea yesterday afternoon at the home of Mrs. W. West, 1333 Valley View road.

Mrs. Lawrence Ellis of San Jose, formerly of Glendale, was the commented guest at a luncheon given recently at the home of Mrs. Claude Case, 343 North Maryland avenue. Covers were also laid for Mrs. Charles Ravenscroft, Mrs. H. Goss and Mrs. Emma Winters.

Mr. and Mrs. S. L. Gillan and children of 265 West Maple street went several days recently at Talina Island.

Mr. and Mrs. H. E. Olund and a Robert, formerly of Glendale, who for the past year have been residing at Red Wing, Minn., returned to Glendale and purchased a home on Geneva street.

SCULPTED FREEDOM
NEW YORK, Jan. 6.—Barred from the United States by the immigrant quota law Vram Ovanian, Armenian sculptor, carved a remarkable statue from snow at an island and was admitted.

One can ride in a Jewett without eating yourself.—Adv.

Society

LODGES - CLUBS - CHURCHES

HEAD OF STATE 50 GLENDALEANS P. T. A. VISITS OF SUNSET CANYON GLENDALE CLUB ORGANIZE

Is Guest of Honor at the Home of Mrs. C. E. Hutchinson

Mrs. Harry J. Ewing of San Jose, state president of the Congress of Mothers and Parent-Teacher associations, was a guest Friday at the home of Mrs. C. E. Hutchinson, 246 North Orange street. Other guests at a luncheon complimenting Mrs. Ewing were Mrs. John Robert White and Mrs. A. A. Barton. In the afternoon the Glendale federation, including Mrs. E. B. Moore, federation president, and the presidents of the local associations and chairmen of committees, called upon Mrs. Ewing. Tea and cake were served during the afternoon.

Mrs. Ewing gave the officers a great deal of helpful advice and suggestions to carry on the work of the federation. She will be in the south for three weeks, visiting her last official visit before her term of office expires.

WOMEN'S BIBLE CLASS TO FORM ON THE SOUTH SIDE
The women of the southern section of Glendale met Friday afternoon at the home of Mrs. O. W. Esselman, 1721 Gardena avenue to form a women's Bible class. Dr. Vinnard, pastor of the Tropic Presbyterian church was presiding chairman of the meeting. The name, "Women's Bible Class" of Tropic Presbyterian church was adopted and the following officers were elected: Mrs. O. W. Esselman, president; Mrs. Turbet, vice president; Mrs. Sheldon, secretary; Mrs. Server, treasurer, and Mrs. Ashton, teacher.

The regular meetings of the class will be held the first Friday of each month. The next meeting will be held at the home of Mrs. Wilcox, 1924 Gardena avenue. Everyone interested is invited to be present at the Tropic church Sunday morning at 9:45 o'clock.

PARLIAMENTARY LAW SECTION TO MEET
The joint meeting of the parliamentary law section of the Tuesday afternoon club, with Mrs. E. A. Brandstater as curator, and the legislative section, of which Mrs. B. O. Holbrook is curator, will meet Monday afternoon at 2 o'clock at the home of Mrs. W. H. Verity, 511 West Broadway. Mrs. P. S. McNutt will be the leader of the parliamentary law drill.

J. O. C. CLASS TO ENTERTAIN YOUNG MEN
Next Tuesday evening members of the J. O. C. class of the First Methodist church of which Mrs. Lydia Rehberg is president, will entertain members of the young men's Bible class. Mrs. Anna Starkey is chairman of the committee of arrangements. Since the convention held here the J. O. C. class of that church has had a large increase in membership and now numbers about 175.

DR. AND MRS. CRIST TO RESIDE AT SANTA ANA
Mrs. Charles Starkey who recently entertained Dr. and Mrs. C. M. Crist and their son Kenneth at dinner, reports that the Crists are this week moving to Santa Ana, where they will be permanently located. Dr. Crist is now superintendent of the San Diego district, which covers a big field and Santa Ana is a comparatively central location for him.

MRS. RANDALL TO ENTERTAIN
Mrs. H. W. Randall is today entertaining informally at her home, 429 North Kenwood, the married ladies of her organ class. It will be a purely social affair.

MR. AND MRS. KILBORN AND DAUGHTER ARE HOSTESSES
Mr. and Mrs. O. L. Kilborn and daughter, Laura Wilford Brown of 217 West Loma, entertained the following guests last evening at a 6:30 dinner: Mr. and Mrs. A. W. Ewing, Miss Fay Denman, Mr. and Mrs. L. S. Brown. Seated at the table were these eight and Mr. and Mrs. O. L. Kilborn, Farris C. and Miss Laura Wilford Brown. Mr. Glade is to return to Grand Island, Nebraska, next week, to take up again his work as an expert miller in a large flour mill there in which he owns most of the stock. The work is very exacting and Mr. Glade is enabled to visit his family here only two or three times a year, though he hopes to eventually dispose of all his extensive milling interests in Nebraska and make his permanent home here. He and Mr. Lee Etting are owners of the bungalow court on Loma avenue, a short distance east of Brand, and will probably do more investment building in Glendale.

REESNERS ENROUTE ON SAD JOURNEY

Mr. and Mrs. Charles Reesner of 1133 N. Louise have been called to Atchison, Kans., because of the death of Mr. Reesner's mother, who had reached the age of 93 years. They will also go on to Springfield, Ill. their old home town, while in the east.

Conservative people buy Jewett cars.—Adv.

A delegation of about fifty Glendaleans, members of the Sunset Canyon club, and carrying with them some 75 proxies of other Glendale members, attended a meeting held Friday night in the Hollywood chamber of commerce to protest against the raising of the dues of the club and some other matters complained of.

A protest was registered against the increase of dues from 80 cents per month, guaranteed when the stock subscriptions were taken out, to \$2.50 per month by the board of directors without consulting the membership.

The most important action taken was a vote that all proxies filed with officers of the club for use at the annual meeting to be held next Saturday, January 13, at 4 p. m., on the club grounds, shall be revoked, and all members who have sent in such proxies shall either attend in person and cast their votes or shall turn over proxies to the protestants at this meeting.

Mr. Kline of the First National bank of Hollywood, was made chairman of the Hollywood delegation and Dr. C. S. Steelman chairman of the Glendale group.

The question of whether the increased dues should be paid or withheld by members was referred to Attorney Albert Pearce of the firm of Evans & Pearce, who appeared as the legal adviser of the Glendale protestants and who is a member of the club. He recommended payment of the dues, under protest.

CHAPTER B. A. ENTERTAINED AT THE CHARLES TOLL HOME
Chapter B. A. was entertained for an all-day meeting Friday at the home of Mrs. Charles H. Toll on Kenneth Road. A two-course midday luncheon was served, the hosts being assisted by Mrs. Elizabeth Bowling and Mrs. Pauline Russell.

The luncheon program which followed the opening of the chapter of the serial story by Mrs. Essie Preston and was followed by the numbers of a musical program made up of all American compositions. Miss Elizabeth Motterson and Mrs. Edith Arnold sang a group of duets—"I Waited for the Lord" by Mendelssohn; "O Lovely Night," and "A Lover and His Lass." They were accompanied on the piano by Mrs. Alice Ripley.

Mrs. R. M. Brown read a paper on American composers, Miss Motterson sang a group of songs, Gerald Toll, son of the hosts, played a saxophone solo, accompanied on the piano by Mrs. Eva Cunningham. Mrs. Alice Ripley played two piano numbers—"Novellette" (Cole) and "Wild Rose" (MacDowell). Another group of songs by Miss Motterson closed the program. D. Lusby of the day were: Mrs. C. D. Lusby of Berkeley, Mrs. Dan Campbell, Mrs. J. G. Huntley, and Mrs. Mabel McFadden of Chapter L, and Mrs. Reed of Chapter A. S. Los Angeles.

BAPTIST YOUNG PEOPLE'S UNION HOLDS MEETING
At the meeting of the Baptist Young People's Union, held at the church Friday night, new officers were elected as follows: President, Willard Keith; vice-president, Stanley Walker; secretary, Eleanor Rich; treasurer, Elwyn Osterander. The union voted to divide into four groups which would take charge of the Sunday evening meeting.

At the close of the session a social hour was enjoyed and refreshments of cocoa and cake were served by the committee in charge of that portion of the program, Edgar Schockley and Miriam Rich.

S. O. S. CLASS OF CENTRAL CHRISTIAN CHURCH ELECTS
At the business meeting of the S. O. S. class of the Central Christian church held Friday night at the home of Mrs. Alton A. Smith on Pioneer Drive, with Miss Fern Peters, president, in charge, the following officers were elected: Alice Mercer, president; Rose Jennings, vice-president; Garnet Peters, secretary; Fay Williams, treasurer. After the business session Mrs. Canfield, who was formerly Miss Ruth Huff, was honored with a kitchen shower. During a social hour refreshments were served.

THE HULLS ENTERTAIN MANY VISITORS HERE
C. L. Karloof of Albuquerque, N. M., Mrs. A. Baker, Lee Angeles and Mrs. Nancy Smith Tuscola, Ill., are the week-end guests of Mr. and Mrs. Thomas Hull, 328 West Colorado street.

GREEN HOLLOWAY NUPTIALS HELD IN GLENDALE

Miss Helen Louise Green of 805 East Chestnut street became the bride of Clifford Holloway of Hollywood at a quiet wedding held at 8 o'clock Thursday night, January 4, 1923, in the wedding room of the Central Christian church. Reverend Clifford Cole officiated at the wedding ceremony. Miss Grace B. Verdugo acted as bridesmaid, Mr. and Mrs. Holloway plan to make their home in Hollywood.

CHALMER D. DAY IS INSTALLED BY LEGION

New Officers Take Charge of Affairs of Glendale Post

At the meeting of the Glendale post, American Legion, Friday night, officers elected for the new year were impressively installed by Comrade Dwight Stephenson, who had been given authority by the state department, the new officers seated being: Chalmer D. Day, commander; Mitchell Frug, first vice commander; Donald Packer, second vice commander; Rev. C. M. Calderwood, historian; Claire E. Ansapach, adjutant; Henry Prussing, treasurer.

Previous to the installation there was a business session, at which retiring officers and committee chairmen presented reports showing faithful work, the reports of Comrade Delgado, chairman of sick committee, Comrade Frug of the house committee and retiring Commander McBryde being especially fine.

At the close of the installation the officers expressed their appreciation of the honor which the post had paid them and pledged loyal service to the post, retiring officers and others also pledging loyal support to the officers. In an impressive manner retiring Commander McBryde transferred to Commander Day the keys of the commandery and its ritual.

The attendance was large and the most optimistic spirit prevailed, the feeling seeming to be unanimous that before 1923 closes the post will be in a home of its own.

A social hour followed the installation, during which a supper was served.

Any child can drive a Jewett.—Adv.

BRIDAL COUPLE ARE GUESTS OF FRIENDS

Mr. and Mrs. Ira Roy Williams who were united in marriage Wednesday evening by Rev. Louis Tinning at his home, 220 North Belmont street, are now at home to their friends at 1008 South Glendale avenue. Mrs. Williams was Miss Agatha McAllister. It was a very quiet affair, the contracting parties being attended by the bride's sister, Mrs. J. McWilliams and by Mr. Hunt, a friend of the bridegroom.

LUCAS-HARRIS NUPTIALS HELD

The marriage of Miss Zula B. Lucas of 140 North Maryland avenue and John R. Harris, who is employed in the city engineer's department took place on Saturday afternoon, December 30, 1922, in the wedding room of the Central Christian Church. Reverend Cole officiated at the ring ceremony. Mr. and Mrs. Lucas, parents of the bride, were present. The young couple were attended by Mr. and Mrs. Seymour of Los Angeles.

Betrothal Yet of Duke of York Is Opposed by King, Is London Report

Continued rumors from London insist that the next royal engagement to be announced will be that of the Duke of York, second son of King George and Queen Mary, and Lady Elizabeth Bowes-Lyon. Lady Elizabeth is the daughter of the earl of Strathmore and Kinghorne. It is said, however, that King George does not approve of the Duke of York's entering upon an engagement yet. The Duke of York, who is twenty-seven years old, and Lady Elizabeth are shown above.

Felt Hats for Fall
Just the thing for the fall suit or tailored street frock are medium sized hats of felt, ribbon trimmed. They are extremely smart.

Instead of waiting for things to turn up, turn them up while you wait.

Intermediate C. E. to Hold Banquet

The Intermediate Christian Endeavor society of the Presbyterian church will hold its second annual banquet next Friday night, January 12, in the Sunday school room of the church. This affair is expected to be one of the best meetings of the year. The general chairman of the banquet is Harold Majors who is ably assisted by Miss Mildred Thompson. Mr. Majors announces that this banquet will be far more interesting than the average young people's banquets. There will be a fine dinner served at 6:30, after which the president, Mr. Paul Edmonds will call upon some of the most prominent members to make a few remarks. There will be special music and a general good time for all present.

Every Jewett owner is a Jewett salesman.—Adv.

"You seem distressed, sir," observed the young man who had been a frequent caller at the house. "I am ruined, my boy. Nothing left!" the old gentleman declared sadly.

"Oh, don't say that," the young man comforted, edging toward the door.

"You will at least have your dear daughter left. Good day, sir."

Occasionally a widow flirts with a married man merely to see whether his wife will get busy.

If a woman can't say anything mean of a rival, she is pretty sure to remark: "Well, she'll bear watching."

Jewett cars sell themselves.—Adv.

DEATHS—FUNERALS

LOSE SMALL SON
Mr. and Mrs. Joseph H. Walsh of
1439 Gardena avenue, suffer-
ed a bereavement in the death on
Thursday of their infant son, born
two weeks ago. Services were
conducted the same afternoon at
3:30 o'clock in the Scovern parlors,
with interment in Grand View Me-
morial Park.

WILLIAM HILLIARD GAGE
William Hilliard Gage passed away
at 1229 Dorothy Drive Friday after-
noon, January 5, 1923, at the age of
35 years. He was a prominent school
teacher in Chicago for about thirty
years. Mr. Gage had resided in Glende-
dale for the last eight months and in
California for over two years. He was
a native of Canada.

Mr. Gage leaves a widow, Mrs. Mary
Jane Gage; a daughter, Mrs. James
L. Thompson, of 419 Riverside Drive,
and a son, William H. Gage, of 1229
Dorothy Drive. Funeral services will
be held at the parlors of L. G.
Scovern undertaking company, Janu-
ary 8, at 2 o'clock, with interment
at Grand View.

When an Irish barrister was
pleading one day a donkey brayed
loudly outside the building.

The judge said: "One at a time,
if you please."

After counsel had resumed his
seat and the judge was summing
up, the same interruption occurred.
"I beg your lordship's pardon. I
am anxious not to lose a word of
what you say, but there is such an
echo in the court."

One of the things every husband
should know is the way home im-
mediately after office hours.

GLENDALÉ—CITY
WITHOUT A SLUM,
WITHOUT SQUALOR,
WHERE BEAUTY MAY
BLOSSOM.

Glendale Daily Press

GLENDALÉ, CALIFORNIA, SATURDAY, JANUARY 6, 1923

SECTION TWO

WHERE MEN MAY
BUILD WITHOUT
FEAR OF EVIL AP-
PROACHING THEIR
HOMES.

CAHUENGA PARK LAND CALLS GLENDALIANS

IS GLENDALÉ EQUIPPED FOR RUSH OF POPULATION?

By JOHN H. GERRIE
Civic Development Expert

California is off for 1923 in "seven league" boots. Every city, every community, every county aspires to new records of growth in the year ahead.

Record increases in population, new high marks in building permits, top notches in bank clearings are being visualized in every section and corner of the Golden State. The race is on.

To insure population gains a score or more of progressive cities are raising advertising and publicity funds with which to make their particular advantages or charms better known outside their own communities. Chambers of commerce are entering more extensively into the issuance of descriptive pamphlets and booklets and in some cases ready boards are getting out community literature of an appealing character.

In this sweeping publicity campaign the cities of Southern California will take the lead. It has been estimated that more literature advertising Southern California will go through the mails in 1923 than in 1921 and 1922 combined. That will be going some!

There can be no doubt as to the result of so much well planned advertising. The inrush of prospective residents and investors will be greater and greater. Already coming strong, it soon will begin to pour in like a tidal wave. And no one can foretell the finish. As someone has remarked, there'll be no finish—at least not in the time of anyone living today.

With new population will come new industries, new enterprises, new capital, new homes, new apartment houses, new hotels, new business blocks and more automobiles. Glendale and district are among the strong contenders for increased size, wealth and activity. We're on the list for the "once over" of almost every newcomer into Southern California.

When the flood gates are opened and the human stream pours in, how will we receive it? Are we in shape to absorb our share? Can we make good on our printed promises? Our ability to stand up in the flood will be the measure of our profit from it.

Sometimes in the past it has taxed us to the limit to accommodate the automobile traffic that surged into our streets on special occasions. Are we prepared for a greatly increased traffic that will come with increased population in city and district?

And when that population comes will we possess the parks and playgrounds, the school sites and church sites, the automobile parking spaces and the industrial areas that will be demanded by the large additions to our ranks? In other words, are we as prepared as we think we are for large increases in population?

To those who answer that conditions will take care of themselves as they arise might be pointed out the terrific traffic congestion in the main streets of Los Angeles as a "horrible example" of leaving to the future the working out of its own salvation. It also might be remarked that provision for boulevards, parks and recreation centers could be made now at a fraction of the cost and none of the annoyance of ten years hence. Every year of delay will add to the amount that must be expended for necessary improvements some time.

But, perhaps, of more immediate concern will be the effect of lack of adequate preparation upon those prospective residents and investors we now are aiming to attract. The city best prepared in all respects will be the city most likely to win quality and quantity, wealth and homes, in the westward flow of humanity. We have on our "seven league boots" but let us make sure also that we are otherwise equipped for a fast journey.

These suggestions are not made in criticism but are offered in the chance that they may be helpful toward constructive thought.

MAY McAVOY AND JACK MULHALL, WHO WILL ATTEND OPENING
OF CAHUENGA PARK SUBDIVISION, AND VIEW OF THE GREAT TRACT

Value of Brick and Wood Is Compared

While it is shown that brick has, in the long run, greater durability than frame construction, the mildness of this climate permits of the wider use of frame, and in a way makes a dwelling architecturally attractive and of long durability, provided proper attention is given to upkeep. The use of brick in small homes is made more expensive than frame because of the higher cost of the machinery, labor and the fact that a brick foundation must be heavier, and, therefore, more costly. Experts estimate that the cost of a brick dwelling runs from 10 to 20 per cent higher than frame. Only a small part of this added cost, however, is represented in the material. It may be said in favor of the brick construction, however, that it requires a smaller expenditure for upkeep and fire insurance, and in the long run, the home-builder is able to realize economies that may offset the higher original cost.

POINTS OF VALUE TO REAL ESTATE BROKERS DISCUSSED AT RECENT CONVENTION HELD AT SANTA ANA

Edwin T. Keiser, Real Estate Commissioner of
California Gives Many Valuable Suggestions
to California Realtors

Suggestions for the improvement of real estate conditions in California were presented at the annual convention of the California State Real Estate association, which was held in Santa Ana recently.

Among those presenting the most constructive ideas for the betterment of the profession and the protection of those who buy real estate were President C. C. Tatum of the state association and Edwin T. Keiser, real estate commissioner of California.

In President Tatum's report he outlined a large number of suggestions for the guidance of realtors in California. Among the most important of these were the following:

"Every realty board, big and little, should be organized or reorganized upon the 100 per cent three-way basis—with annual dues, providing for local, state and national memberships.

"This would make every member a really representative California realtor. In many boards, annual dues are fixed at \$25, out of which \$10 is paid to the state and \$3 to the National Association.

"Establish ten regional vice-presidents, and do away with the regional director plan.

"The state with over 100 boards must be divided into geographical units easily visited by a centrally located vice-president. Greater service to the association would result.

"Every realty board should have at least one dinner meeting monthly.

"The State Association should confine its activities always to real

and the Sacramento valleys are great areas of ever-expanding real population that we are certain are headed this way.

"The agreement of the seven states on the Colorado River pact is big news for real estate interests.

"Every realty board should keep a close watch on municipal legislation. An active committee of three or five members should be on the alert to assist the city council and city authorities in all useful matters and to help said officials avoid the pitfalls of useless and cumbersome ordinances.

"Be on guard against unwise measures increasing your taxes. Real estate pays \$0 to \$5 per cent of all the taxes.

"Every realty board should hold at least one annual dinner or banquet, to which would be invited the property owners and others interested in community development.

"Every realty board should combine on local newspaper campaigns advertising the board, its members, their aims and ideals, through medium of the local press.

"Every realty board should adopt the state-wide standardized forms. If they require revision, then send in your suggestions.

"Certainly, if twenty-six realty boards accept them they must have great value in realty transactions. Let us standardize our entire business at once.

"The state association should continue its research and activities in behalf of more equitable adjustment of the local and state tax burden. Hidden wealth and tax exempt securities should be made to bear their fair share of the expenses of government.

"In associate membership lies a great source of strength for our organization. Upward of seventy associate members have been secured this year. In 1923 we should have ten times that many of such sustaining memberships.

"Our present constitution calls for three directors-at-large. I would recommend giving our associate and salesman members representation on our board of directors and would suggest to that end we in money.

1923 WILL BE THE BANNER PAINT YEAR

"While 1922 was a banner year for the consumption of paint in America, 1923 should eclipse, by a wide margin, this year's figures," said a local paint dealer this morning.

"The coming 12 months promise to mark a new epoch in the consumption of this commodity—and for very good reasons.

"When it is considered that an annual loss of approximately \$1,000,000,000 from preventable decay, or about two per cent of the country's total property valuation, until a few years ago was incurred by inattention to property protection, the economic need for paint at once becomes apparent.

"Through arousing the public consciousness to the reduction of such property losses by liberal use of protective coatings, a great hold has already been cut into needless depreciation."

crease the number of directors-at-large to five or seven."

Commissioner Keiser read an instructive article concerning the work of his department and methods taken by him in protecting the public from dishonest dealers.

He estimated that the money saved to individuals through his department for one year would approximate \$150,000.

However, Mr. Keiser did not deal only with the difficult problems of his profession but also made some suggestions for improvement of legislation.

In part, Commissioner Keiser said:

"I have one suggestion as to an amendment which, if it is possible to place upon the statute books, I believe in a large measure will eliminate many of the causes and opportunities for fraudulent dealings.

"Cause of the grievances coming before the department during the past year, have had as a source, some real estate promotion scheme, either subdivisions, or oil lot subdivisions, or colonization projects.

"The law, as it stands today, throws a partial safeguard around the colonization projects, in that it provides for the real estate commissioner to make an investigation, and also approve of the project.

"This is effective only as the public may have knowledge of the fact that they can secure information of the project in which they are interested from the state real estate department.

"If the public had this knowledge any project not meeting with the approval of the state real estate department would have rough sledding.

"As the law stands today, not being mandatory upon these promoters to secure approval, they may promote almost any kind of a project without the real estate department's hearing about it until the people are injured.

"I believe it would be much better if it were possible to make it a felony for anyone to offer a real estate promotion scheme without first securing the approval of the project from the state real estate commissioner, giving the real estate commissioner the same power over this kind of investments that the commissioner of corporations has over any stock selling scheme.

"It would become necessary for these people to come to the real estate department for permission, rather than have the real estate department go to the trouble of running them down and investigating their business after the offenses have been committed and the investors have lost their money.

OPENING OF SALE OF SUBDIVISION TO TO BE MARKED BY PRESENCE OF TWO MOVIE STARS WHO ARE INTERESTED

Cabinet Model Victrolas to Be Given Away to Mark
First Day As Notable Event in Opening
of Cahuenga Park Tract

Two fine cabinet model Victrolas absolutely free is the inducement held out to visitors at the great "Cahuenga Park" subdivision Sunday. The presentation will be conducted by two famous screen luminaries, May McAvoy and Jack Mulhall in person, both of whom have bought heavily in this tract and have large investments in other Los Angeles property. Among the recent triumphs in which Miss McAvoy starred are "Top of New York," "Thru a Glass Window," "Virginia Courtship," "Kick in" and "Grumpy." Jack Mulhall was leading man in "Molly O" with Mabel Normand, "Turn to the Right," "Broad Daylight," "Off Shore Pirate," "Fourteenth Lover" and "Within the Law." He is now leading man with Norma Talmadge.

C. C. Albright, of Bundy & Albright, subdividers, says that there are absolutely no strings of red tape to the offer and that every person who registers at the tract will have an equal chance to win one of the beautiful instruments whether interested in lots or not. He emphasizes the fact that registering incurs absolutely no obligation.

Referring to investment possibilities, Albright said, "It is impossible to lose by placing money in Cahuenga Park, because our prices are based upon what the land will produce rather than on what we expect the growth of the city will make it worth. Every element of speculation is removed from investing here, yet a man can buy a small farm and earn a good living from it for a few years with the absolute assurance that a city will grow up around it and make it highly valuable. The neighboring cities of Glendale, Van Nuys, Burbank and San Fernando are all excellent examples of how this has worked out in the past and the district is now growing faster than ever."

Earnings from an acre in this district vary, according to Albright, from \$1500 to \$2500 an acre, but the average, where intensive cultivation is practiced, is about \$2000 an acre.

Development at Cahuenga Park is proceeding very rapidly. A number of homes are already in process of construction and a large crew of men and teams is working daily on the streets and other improvements.

Plans for the new Mulholland drive along the top of the "Cahuenga Park" foothills will soon be completed. A prominent local real estate editor predicts that values here will triple as soon as the drive is completed.

"Cahuenga Park" is located on Ventura boulevard, the state highway to San Francisco, at the junction of Sherman Way. The subdividers extend a cordial invitation to every one who would like a chance to win one of the Victrolas and meet Miss McAvoy and Mr. Mulhall, to come to the tract Sunday.

C. C. Albright, of Bundy & Albright, subdividers of Cahuenga Park, referring to the hundreds of questions asked by people who are planning to get back to the soil, says that the questions which come up most frequently are:

"How much can be made on an acre? How soon can returns be expected? What crops are most profitable? What will it cost to start?"

The strawberry, according to Mr. Locklin, is one of the quickest and most profitable producers and the "Carolina" the best type for the soil and climate of the San Fernando valley. 10,000 plants, Mr. Locklin states, will cost \$100.

About \$10 will cover the cost of preparing the ground. Field work and irrigation will amount to \$15. The cost of picking the first year's crop at 2c a box totals \$100. This makes the entire cost of production of an acre of strawberries \$226, or .045 a basket. Figuring the selling price per basket at 15c the profit per basket is .105. On the first year's production this means a net profit of \$525. Eliminating the labor cost in cases where the farmer does his own cultivating raises the profit to \$640 per acre.

Full crops may be expected the second and third years. These average three times the first year's crop. The profits will be about \$1575 per acre when labor is hired and \$1920 when no outside labor is used. These figures are very conservative and can be easily surpassed on small tracts where intensive cultivation is used. The berries grown in the Cahuenga Park district are exceptionally large and luscious and there is a steady demand for them at high prices.

One man can do all the work on a five acre tract except picking. On a smaller tract he can do all the work with ease.

According to C. C. Albright it takes very little to start as a small first payment is all that is required to take care of future payments. The total cost of half an acre is as low as \$350. This price includes sur-

face streets, cement curbs, water, to secure the land and the profits gas, electricity, and other modern improvements.

Cahuenga Park is located in the San Fernando valley at the junction of Ventura boulevard and Sherman Way. Mr. Albright predicts another Hollywood at this point and judging by the rapidity of sales and activity, his prediction will come true.

Anyone wishing more detailed information about the possibilities of small farms at Cahuenga Park is invited to inquire at the tract office on Ventura boulevard at Sherman Way, just past the Hollywood Country club.

The members of the Glendale Realty Board have been carefully investigated before being accepted as members. They are honest, conscientious and active.

These are the three primary virtues that qualify for membership, and by adhering to this standard, much has been done toward the success of the operations and big results have been obtained.

In listing a property for sale with the Glendale Realty Board it is listed exclusively and individually with each member.

In this manner the property is not only listed in the immediate neighborhood, but offices in the entire city of Glendale receive it, which greatly increases the opportunity to sell.

There are a number of advantages in obtaining a board listing by an office. It enables him to secure an exclusive listing that could not otherwise be obtained.

He has 50 or more fellow offices working to aid him in the sale of this listing.

The manner in which a commission on the sale of a board listing is split, and which has at all times been found satisfactory by the members are as follows:

A list a property which is in turn sent to B. C. D., etc.; the commission on the sale of same amounts to \$250.

D sells this listing, immediately advising board secretary, who sends notices to all offices informing them of said sale.

Where the commission is \$100 or less, the fee is \$25. After deducting the board fee, the balance goes two-thirds to selling office and one-third to listing office.

A would receive \$30 for listing the property and D \$160 for selling it.

By cooperating in this manner, board members have made hundreds of dollars that otherwise would have passed them by.

The Glendale Realty board is incorporated to secure for its members the benefit of united effort; to promote good fellowship and fair dealing; to protect both its members and the public in general from the irresponsible dealers in real estate; to promote the enactment of legislation for the protection of property rights; to do all else in its power which may tend to the upbuilding of the real estate business.

REASON GIVEN FOR
CONCRETE CRACKS

Cracks appearing in the cement of the house foundation after the completion of the building are usually due to an improper mixture, poor mixing or the fact that the cement has been permitted to set too rapidly. Where the house foundation is high on any corner of the building it is a wise precaution to reinforce the concrete with links of strong wire laid in the concrete at the places which will be required to bear the greatest strain. Baling wire may be used in this way with good results. In the event that a homebuilder makes his own contract with the cement contractor, it may be a good thing to see that this reinforcement is carried out.

LUMBER DEMAND WILL NOT RAISE CONTINUES BUILDING BRISK COSTS

Commons have advanced in price; clears have not advanced, but remain firm; shingles are steady but not any stronger; lath are moving up sharply; both tonnage and cars are scarce; mills and distributors are loaded up with orders, and the demand for building material is brisk as ever, says the California Lumber Merchant, about the local market.

While the foregoing might be interpreted to apply only to fire lumber, it can equally well cover the redwood situation in those particular areas where it is applicable to redwood.

One significant element so far as the demand for common lumber is concerned is that the market seems to be absorbing growing quantities of the lower grades, such as No. 2 and No. 3, and even No. 4, where occasion requires.

So long as this kind of a demand continues it is useless to look for any distinct weakening in prices, and looking at it from a California viewpoint, the demand is going to continue for quite a while longer—indeed, you might say.

The fact of the matter is, the California market now is absorbing all the lumber that the steamship lines and railroads are physically able to bring—and crying for more.

"There will be no advance in price during 1923 on any building materials manufactured or produced by this firm," said the manager of one of the largest building material concerns in Southern California recently.

With ample evidence already in sight that Glendale will enjoy a tremendous volume of building activity during the coming year, surpassing substantially, it is believed, the splendid record of 1922, building material costs have become a matter of supreme importance.

From various sources intimations have come that they will take a decided shoot upward.

These rumors have led to numerous requests for a definite statement on the subject from architects, engineers, contractors and owners.

It is this, he declares, which has led to the official announcement by his company respecting its attitude on prices.

"We would regard it as distinctly unfortunate if there were any increase in the cost of building materials at this time," said this manager.

"Glendale is enjoying a positively marvelous building movement that should be allowed to develop absolutely unhampered."

SPARR HEIGHTS CO. IS PROUD OF RECORD

"Charles M. Schwab's recent statement in the Examiner that Los Angeles is the wonder city, wonderful because of what it has accomplished in the past few years, and wonderful because of the wealth of opportunities that its future holds, is indicative of the impression our rapid, steady and healthy progress has made upon those master minds who weigh conditions carefully and voice their judgments in a conservative manner," said Mr. Walters of Francis, Barnum & Walters, the owners and subdividers of that beautiful tract in the Verdugo valley.

"The advice to the world of that trained observer, Arthur Brisbane, to 'buy California land on the hill-sides,' is also a strong reinforcement of our own judgment in un-

IT PAYS TO HIRE GOOD ARCHITECT

The employing of a good architect for the construction of a small home as well as the large dwelling, is a wise move. A conscientious architect who carefully watches every step in the construction will more than save for the home-builder the amount of his fee. A considerable portion of the cost of construction is due to causes which can be eliminated by the architect's watchfulness. Moreover, the homebuilder is able to realize a much more artistic dwelling from a plan prepared by a skilled architect. This undoubtedly adds to the intrinsic value of the property, and is a distinct advantage to the seller in the event of a resale.

dertaking the improvement of such a property as Sparr Heights.

"During the last year we have witnessed a pronounced recognition on the part of discriminating buyers of the future value of hill-side homesites back from the ultimate congestion of this to-be great metropolis.

"The reports of the railroad passenger agents already indicate an influx of tourists that is 25 per cent greater than in any previous year.

"Few people realize that we are adding a city the size of Albany to the population of Los Angeles every year. Forty per cent of these people want homes and all of them are looking for investment.

"They realize that the 'Star of Empire' is really moving westward and they are simply following the lead of the leading financiers and men of affairs of the country.

"I sometimes think that those who are on the ground hardly realize the opportunities that abound on every side, all directly dependent upon our matchless climate and the constantly increasing value of land in Southern California.

"We are justly proud of our success at Sparr Heights.

"A sale of \$600,000 worth of land and a list of 28 homes, construction on which will be started in the immediate future, shows the appeal that this choice property makes to intelligent and discriminating buyers.

"We are fortunate in having at Sparr Heights every kind of a homesite that one could possibly desire. There is flat, level land for the business section; long, sloping areas for the bungalow district; hill-sides, secluded canyons, knolls and meads for those who wish to build distinctive homes or create beautiful estates.

"From every location are visible the Green Verdugo Hills and the towering Sierra Madre, while our limited business area offers an opportunity for speculative investment unsurpassed.

"Business with us is slowly, but surely and steadily, increasing daily in volume, and I am confident that, subject to the temporary lull of the holiday season, it will continue to augment in volume and that by the middle of January it will be more than satisfactory."

BLENDING ITALIAN AND MODERN ARTS

As the world looks back to the Acropolis of Athens and ancient Rome for her architectural inspiration, so must she look to Italy for the highest expression in painting and decorative art.

Italian Renaissance are magic words that have rung down through the centuries, carrying the message of art achievement by great masters, who through their soul awakening poured forth beauty in their several arts, the patterns of which today are the inspiration for the finest and the best.

The contemplation of furnishing an Italian home should be approached with much joy, as there is a world of beauty from which to choose carved or inlaid furniture, wrought iron, marble and a wealth of loveliness in textiles, including fabrics, tapestries and rugs.

The sincere decorator will so direct his plan that modern comfort and utility will blend in friendly relationship with the unchallenged art of the Renaissance.

It is always pleasing to find the floor of a hall in black and white marble, with walls of deep old ivory, against which pictures, tapestries and furniture look so well. Dull red hangings in velvet or brocade reflect just the brightness needed, and such a hall is best lighted by wrought-iron sconces, torchieres and swinging lamps.

The living-room, as its name implies, should be a room in which to live, and while the mantle and moldings should emphasize the Italian spirit, comfortable chairs and davenport should be interspersed with the typical Italian types like the high-back and Savonarola chairs, chests, benches, tables, consoles, etc.

A piano and phonograph should supply the soul with music harmony and an ample desk and well-filled bookcases supply food for the mind.

For inspiration, pictures and art objects should be chosen with care, and some copies of the old masters will blend harmoniously in this type of room.

Wrought-iron, carved wood or polychrome sconces, electroliers and lamps will lend much beauty to the room, and should be shaded by parchment or silk shades to blend with the color scheme.

The dining-room and chambers should be comfortable, but always mindful of the relationship of the exterior to the interior of the home.

It is a delightful experience to furnish this style of home, and when we put our soul into it, we feel, as this writer so aptly puts it, "Begin! Live! Aspire! Realize the best possible ideal of the

CONSTRUCTION OF OAKMONT CLUB TO BEGIN NOW

J. Lindanger, Secy., Says
18-Hole Course Starts
Next Week

Mr. J. Lindanger, secretary and treasurer of the new Oakmont Golf and Country club, recently incorporated, the membership of which will consist largely of those people who are prominent in the social circles of Glendale, Eagle Rock and vicinity, states that construction work on the magnificent 18-hole golf course which is to be created at Sparr Heights will begin next week. The vines that now occupy the upper portion of what will be the course will first be removed and the teams will be immediately put to work grading.

The foundation for the immense swimming pool will also be started at once and rapidly pushed to completion. Plans for the clubhouse are also well under way and it is expected that the building will be completed early in the coming year.

The membership, which is limited to 750 is swelling rapidly. Golf enthusiasts of this section realize what a great advantage it will be to have such a superb course as this will be, in their immediate vicinity, especially when the beauty of the surrounding country is considered. Bounded on two sides by great mountain chains, added to the zest of the game will be the interest in the environment of scenic beauty.

The clubhouse will be located well up on the western slope to the Verdugo hills and from its front porch will command a view not only over the entire golf course but will take in the whole Verdugo valley and the Sierra Madre range, running north and south as far as the eye can see, with Mts. Lowe, Wilson, Markham and Islip looming up immediately in front.

This course has been laid out under the supervision of leading experts in planning and will be second to none in Southern California. It will establish a reputation that will draw golf enthusiasts to Sparr Heights and prove another factor in creating the atmosphere of culture and refinement that will eventually prevail to such a large extent in the choice section.

moment, and this earnest effort shall lead you to greater achievement."

USE CHAMOIS ON CAR
After washing the car, dry the body immediately with a clean chamois, but never use the same sponge or chamois that has been used at any time on the running gear.

Signs of the Times in Prophecy

"Millions now living will never die."

—Judge Rutherford.

Not in a hundred years, or since the French Revolution and the wars of Napoleon, has the world seen a like period, and that period is outclassed by the magnitude of the issues now involved.

Prophetic utterances of both the Old and New Testament take on a new meaning. Certain it is that a new awakening in prophetic study is here. On all sides men are asking concerning the relation of Bible Prophecy to the present turmoil and unrest.

In this momentous lecture Mr. Stark will bring positive proof, by linking Bible prophecies with present day events, that the Kingdom of Messiah will soon completely supplant the existing rulership of earth and, because of this fact, there are millions now living who will actually never go into the grave. The lecture is not a dry discussion of theology, nor an attempt to convert you to some new, fanatical religion, but it is a glorious proclamation of "this Gospel of the Kingdom" which Jesus said must be preached in all the world for a witness before the end comes.

You will be thrilled—your heart will rejoice, and you will leave the Auditorium with that which money cannot buy—a clear insight into the conditions confronting the world today and of the glorious outcome.

IN GLENDALE'S FASTEST GROWING SECTION

It is estimated that 10,000 people were added to the population of Glendale last year. Approximately 1000, or one-tenth of these people are living in Fairview. This remarkable growth should command the attention of everybody who is considering the purchase of a homesite, for immediate use or for investment. FAIRVIEW is located on a gentle slope in beautiful Northwest Glendale, with an unsurpassed view, fine soil and drainage, close to transportation, stores, schools, etc.

Last Opportunity To Get A Homesite In This Section On Which A Temporary Home May Be Erected

The Twelfth Unit is located between Glenwood Road and Kenneth Road, West of Elm Avenue, and is the last Unit we expect to have on which temporary homes may be erected.

DON'T PAY RENT—START A HOME

Hundreds of people have done it in FAIRVIEW this last year, with very little cash. If you really desire a home of your own, this is your chance. DON'T WAIT until the 42 lots in this Unit are gone. COME TODAY AND LET US SHOW YOU.

Salesman at Tract all day Sunday. Drive out West Broadway and San Fernando Road to Allen Avenue (opposite Inner-Tube Factory), then up to right two blocks to Glenwood; then to left two blocks to Tract.

THERE ARE MANY NATIVE SHRUBS THAT WOULD ADD GREATLY TO THE APPEARANCE OF THE HOME PLACE

The Planning of the Home Garden Is One of the Most Important Steps in Connection With the Dwelling

Are you wondering what kind of shrubs you should plant on your new home place? Why not turn your attention to some of the native shrubs? A strict following of some of the suggestions here given will help greatly in the formation of a beautiful garden.

There are many reasons for setting plants in rows or hedges, some of which are purely economic and some of which are solely aesthetic.

We plant hedges for windbreaks, for barriers, to serve as fences and for decoration. The use to which a hedge is put will determine the variety of plant that is chosen, its size, color, texture and quality.

As windbreaks throughout our orchard districts the eucalyptus and Monterey cypress are of common use.

For tall, coarse hedges we see many pomegranates, privets, salt brush and plants of similar qualities.

In purely decorative uses there are many different plants suitable for hedge use, the most of which are fine of texture, pleasing of color and adaptable to close shearing.

Among the shrubs native to the chaparral belt of our California hills are several species that are admirably suited to serve the role of hedge plants for decoration or for screening unsightly objects and which adapt themselves readily to the conditions imposed upon the ordinary hedge.

One of the finest of our compact, small-leaved, native shrubs is a relatively small growing kind known as Rhamnus crocea, of which there is also a variety known as R. crocea filicifolia.

This shrub is occasionally arborescent, but generally grows from two to six feet high.

It is low, thickly branched and densely foliated with dark green leaves from a quarter of an inch to an inch long.

It bears a brilliant red, translucent berry, appearing about June, which clings close to the stem of the plant.

Under cultivation this Rhamnus

HARDWOOD TALK OF REAL VALUE

Southern red gum is used in perhaps larger quantities in Los Angeles now than any other hardwood. The furniture factories are the largest consumers.

It may be finished in its natural state, which is very beautiful, or stained to imitate mahogany or walnut.

It is also used as a base for ivory and white enamel finish. It is a very desirable wood for interior finish in residences and public buildings.

Gum grows in the United States from Connecticut to Texas and from Missouri to the Alleghenies, but it reaches its greatest size in the lower Mississippi valley, in the inundated swamp lands.

It also grows in Mexico and south into Central America.

It is a different variety of tree from the gum woods of California and Australia, known under the general name of eucalyptus.

The California eucalyptus has not proven commercially valuable for lumber, largely because of the difficulty in seasoning it without serious damage.

While drying it has a tendency to check and warp, making it undesirable for the ordinary purposes for which hardwoods are used.

Ironbark is a native of Australia, and is used in considerable quantities on this coast for boatbuilding and oil well rigs.

It is very hard, dense and heavy, and of great strength and durability.

It belongs to the eucalyptus fam-

ily, and some trees reach a height of 400 feet, said to be the highest, but not the largest, in existence.

Teak comes from India, and is used in shipbuilding; also to some extent for interior finish.

It is very durable and bears exposure to the weather without shrinkage, or other serious damage.

Koa is a native of the Hawaiian Islands. It is dark in color, highly figured, and is used here principally in the manufacture of ukuleles.

Aromatic red cedar is used for chests and lining in clothes closets. It gives off a pungent odor which is supposed to discourage the busy moth in his depredations among woolen clothing and furs.

It is the principal wood used in the manufacture of lead pencils.

This wood grows quite generally throughout the Eastern and Middle States, but middle Tennessee produces a greater quantity, and a more aromatic variety than any other portion of the United States.

It is also found in scattered growth throughout the West, but is listed by the United States forest service as a separate species, under the name of juniper.

Spanish cedar comes from Mexico and Central America.

It is used almost exclusively for cigar boxes, for which purpose, because of its pleasing odor, it is very popular.

It is also a splendid wood for pattern making.

Poplar is used principally for wagon and automobile work, and grows quite generally throughout the Eastern portion of the United States.

It is an excellent wood for turning and carving, and only recently some very beautiful statues were carved from poplar for one of the churches in Los Angeles.

Rosewood is a native of Brazil, but woods of other species resembling rosewood are found in Mexico and Central America. It is a very beautiful wood and is used for furniture and musical instruments.

Lignum vitae is a native of the West Indies and Central America. Its chief use here is for bearings for propeller shafts in ships.

It is an oily wood, dense and hard.

Ebony is a native of Africa and the peninsula of this country belongs to the ebony family. Furniture made from ebony was found in the ruins of ancient Egypt, and there is a piece of ebony furniture in existence said to be not less than 4000 years old. There is evidence among old records discovered that the Egyptians made voyagers through the Red Sea and brought back ebony from eastern Africa. It is used here for novelties and inlay work.

A wise son overlooks a lot of his dad's talk.

PLACING OF ROOMS IS IMPORTANT FEATURE

The arrangement of the rooms is the second important essential in judging the success or failure of a new building.

This essential, both in commercial and private building projects, is second only to the primary consideration of cost or the investment feature.

It is true that any project which does not measure up to the requirements of the other five essentials—appearance, decoration, stability, speed in construction and service to owner—cannot be an entirely satisfactory operation.

But, as human need is the reason for erecting buildings, it is of primary importance that the needs of the occupants be met by the arrangement of furniture and equipment of various kinds.

These articles must be placed so as to afford the greatest comfort and convenience.

Therefore, the correct course to follow in any building operation is first to have the inside planned before the outside is designed.

To plan the inside properly, a preliminary study of the needs of its prospective occupants (whether tenants or owner) must be made.

This study must be as searching and complete as possible.

A building should be made to suit exactly the needs of its occupants. When they take possession, they should find windows and lighting fixtures placed where they will be most useful; sufficient space, convenient arrangement of rooms and passages, and adequate provision for air and sanitation.

These are all items of importance which are often inadequately provided.

All of these vitally affect the value and earning power of the completed structure.

The outside of the building can always be adapted to the inside arrangement without any loss in attractiveness.

But to reverse this procedure by designing the outside first is to court an inevitable sacrifice of utility inside.

One of the largest real estate operators in New York city is authority for the statement that many New York buildings yield their owners only 2 per cent, 3 per cent or 4 per cent, and that this condition is due, in the majority of cases,

TWELFTH UNIT OF FAIRVIEW OPENS

The 12th unit of Fairview opens tomorrow.

Eleven units have been placed on the market and sold by Hamlin & Hepburn, 203 West Broadway. The announcement of the 12th unit comes as a very pleasant surprise to those who are desirous of building a little home place for themselves and thereby putting themselves in the place of the landlord.

"Why pay rent?" said Mr. Hamlin this morning. "We can show you a better way."

Unit No. 12 consists of 46 lots, all of which are extremely desirable for home building purposes. These lots range in price from \$710 to \$1,275. They range from 48 to 64 feet in width and from 145 to 157 feet in depth. The subdividers of Fairview claim that this is absolutely the last tract they will be able to put on in northwest Glendale. The land they will subdivide in the future will call for higher priced places. These lots are being sold on the down payment of \$50, with \$15 per month installments. Five per cent off is allowed for cash.

Of this tract the subdividers have the following to say:

"Having sold eleven units we are now putting on the market the 12th unit. The best piece of property we have had. Located between Glenwood road and Kenneth road, which will both soon be paved boulevards, this is the last piece of land we expect to have on which temporary homes will be permitted."

"The wonderful success of our subdivision, Fairview, has attracted widespread attention. Since we opened the first unit a little over a year ago, we have marketed over 600 lots, and almost 250 homes have been erected, these being from the garage home to the \$2,566 structure."

"There is no section in Glendale that is more desirable for homes than this beautiful slope, backing up to the Verdugo mountains, and facing San Francisco boulevard. It is a wonderful location indeed."

"Don't pay rent—start your own home. There are only 46 lots in our 12th unit and we believe this will be entirely sold out within a few weeks."

To inefficient planning at the outset.

MAKING OVER THE OLD HOME PLACE

Where shall we live? Who has the plan for a small, cozy house? For the ugly, frail shack is with us everywhere.

Architecture tells us that every building for the housing of man is first a mere skeleton structure of bare walls, window and door openings, roof and floor. The openings must be beautified.

Any old kind of roof, windows or doors may render the place barely habitable, but a shapeless thing, devoid of beauty without and of utility within—with its dismal closet, pantry and sink—and echoing from its bleak walls a homeless sound, ominous, sepulchral and nerve-racking to its occupants.

But the modern Jack starts to rebuild it, working at odd times, occasionally buying stock fixtures that he cannot make or get in his own town.

First, he decides to build an eight-foot porch, then he yanks down that scrawny, old, warped door, and out comes the wobbly windows.

He puts in a modern beveled-glass bungalow door, with diamond-paned windows to match.

These, with his pergola posts and porch trimmings, he sends for

to the nearest lumber mill or supply house.

The shady porch, with the "bungalowized" exterior, is a good start, which has already improved the property wonderfully, but being hard up for money he waits awhile before he starts the interior work.

Now Jack's wife reads in the builders' catalogue about the "built-in" feature—tips and out comes that old dismal pantry.

In goes a large modern sink with drainboard, a glass door cupboard, four bin, a doughboard, ironing board in a niche, shelving with a ventilated home-made cooler in the corner and a hood over the range.

This work is done a portion at a time, and now being out of funds they wait awhile.

Later Jack, with another carpenter, cuts a six-foot arch through to the adjacent bedroom, now used as a living room in daytime, but tressling in the arch bases with built-in linen hooks or bookcases.

A rolling bed costing about \$60 and standing not over two feet high is slid under the raised floor of the clothes closet in the rear bedroom and drawn out at night.

In the old front bedroom, on the outside wall, Jack builds in a dressing fixture with a mirror on top and a writing desk below—a joy by day and a bedroom at night.

All the rooms are bungalowized. The built-in features, reaching from floor to ceiling in the kitchen and in one or two other places, make the house warmer in winter and cooler in summer.

The work has been done a piece at a time as could be afforded.

Spanish Comb

A high Spanish comb of rhinestones, set in a very delicate filigree of silver, adds brilliancy to the evening coiffure.

Babson's Letter

A DAY A WEEK TO PAY TAXES

Roger Babson Says We Pay One-sixth Total Income to Meet Levies

WELLESLEY HILLS, Mass., Jan. 6.—How much of your productive time during 1922 was used in paying taxes?

Roger Babson, the statistician answered the question, today, in a statement that shows the equivalent of one day each week spent to meet the direct and indirect taxes that nation, state, county and city levy.

"One hour and twenty minutes of each business day—or one entire day a week—is demanded of every able-bodied person in the United States to maintain government," says Mr. Babson. "That is the lesson of a recent analysis showing that one-sixth of our national income goes for taxes, federal, state and local. The amount divides almost equally between national taxation and the expenditure for state and local purposes. The question is not, therefore, one of any particular party politics."

"This habit of 'getting the government to do something about it' is one of the most costly and wasteful ideas that we Americans have developed. It has grown upon us since the war. We became accustomed to things then that would not have had consideration before. Now we are exceeded by one nation only, Great Britain, in our cost of being governed. There the 'unemployment doles' and other legisla-

tion put forward by a stronger labor vote have exceeded any thing attempted here as yet. But this tendency must be checked abruptly if American business is to survive in the competition which it faces over the next five to ten years.

"Because any one individual does not see the tax collector, he thinks perhaps that he does not pay, but he does pay just the same. Taxation costs represent an item of overhead in everything that any one buys, consumes, or uses in process of working up to a finished product. The tax burden is inevitable. There are a certain number of potential labor hours represented in the individuals making up any community. The number of these labor hours which it takes to protect his property, make safe his home and educate his children are just so much taken away from the possibility of establishing that surplus of wealth upon which the community thrives.

"The truth of this situation was perfectly clear in the old days when every man in the community was called on for five days' work on the roads a year in lieu of taxes and when the 'nightwatch' was maintained by periodic service of the townsmen. How would you like to go out and patrol a police beat one day each week, year in and year out? Or how would you like to turn your turn as a member of the fire department one day in every six?

This would be our lot if we paid our taxes in the old way today. Or, applying it to road work—nearly sixty days' service on the roads would be required instead of five.

"What wonder living costs are high when this toll comes out ahead of the productive capacity for benefit of the community. The actual taxation does not tell the whole story. Costs of collection, particularly under our system of federal taxation, sometimes treble the amount actually received by the government. Any move to restore excess profit taxes or special classified levies on trade is bound to make the situation worse.

"We should be able to make the people understand that fads and frills all cost money. It is all right to be progressive in our ideas but it is not always true that 'progressive' legislation means an improvement over the old way of tending to our business at home. The country was swept by the cry for 'more business in government' and 'less government in business.' We have not as yet succeeded in edging government very far toward the door of the business office.

"A step toward remedying the condition of burdensome taxation which now hampers business would be to let everybody know when they are paying taxes and how much."

General business as reflected in the index of the Babsonchart shows activity at 1 percent below normal—an improvement of 1 per cent over last week.

IRON AND FUEL MAP

In the back of the new bulletin (No. 27, geological series) on Iron Ores, Fuels and Fluxes of Washington, just published by Dr. Solon Shedd, Prof. Olaf P. Jenkins and Herschel H. Cooper, all of the State College of Washington, there is an interesting map showing just where the deposits of iron ore, coal, and limestone are to be found. The map is the work of Prof. Jenkins, and is drawn to the scale of 1-16 inch to the mile. Anthracite deposits are shown in red, in Whatcom county around Glacier, and in the middle of the Rainier National Forest southeast of Mount Rainier National Park. The bituminous coking coal deposits lie just west, southwest, and northwest of the park, in Kittitas county at the south end of the Wenatchee National Forest, in King county, around Palmer, and North Bend, in Skagit county, near Hamilton, and in Whatcom county east of Lake Whatcom. Bituminous coal is found in part of the Rainier National Forest in Lewis county, between Mineral and Morton, with east of Ashford for some distance, northwest of Cumberland and of Taylor, and in three places about Roslyn. Sub-bituminous coal deposits are shown in Cowlitz county north of Kelso, northwest of Toutle and of Olegua, the largest deposit around Centralia, and three others in King county, southeast of Lake Washington.

The largest limestone deposits are in the north and east, one big patch in Okanogan county in the Concoquilly region, and others through Stevens county, especially in the north. In Pend Oreille down the Clark Fork of the river and around Metolite Falls, a few streaks across the Columbia in Ferry county, and bits in the islands of San Juan county complete the map indications of limestone. Those in western Washington are largely high calcium limestones, while those in eastern Washington are in places practically pure calcium carbonate but in others practically pure magnesium carbonate, with all gradations between.

A useful part of the map is the index to the coal mines at the bottom of the sheet, and the summary table of the known iron ores of the state. Ore deposits are marked with red crosses, mainly scattered northward from Ellensburg and Bellingham, with a few in the extreme northeast. Coal mines are marked with little brown crossed picks.

Finnigan came home late from the club, but in such a temper that he knocked over a lot of furniture.

Mrs. Finnigan was aroused, and sitting up in bed, asked: "What's the matter, Finnigan?" "I'm mad, mad as a hornet." "What's made you so?" "Flashed, down yonder; he called me a liar." "But, man, why didn't you make him prove it?" "That's why I'm so mad; he did!"

Think three times before you speak—then you may decide to keep your face closed.

SAWDUST —By "Buck Sawyer"

BUCK SAYS A PERFECT COOKED MEAL, AND A GOOD COOKING RANGE GO HAND IN HAND. ARE—

HOLLYWOOD MEN SUBDIVIDE OLD RANSOM ACRES

East Broadway and Verdugo Road to Open Tomorrow

Wright and Hogan, Inc., of Hollywood, who have long been engaged in real estate and building, and who have more recently become subdividers, have recently bought the old Ransom estate at East Broadway and Verdugo road, Glendale, and are having their opening there tomorrow, Sunday, Jan. 7. They have subdivided the old estate into 26 lots. I. J. Harlan and O. L. Wright, who have long been connected with the firm, will have full management of the new tract. They have been pleased to call the tract, the Orchard Homes tract. This is a good sounding name and should please all.

The location is unexcelled, there being a fine view and fine boulevards surrounding it, and a grade school close by, and the new, fine high school site near, with two car lines to serve it. The corporation has erected a very nifty little office on the tract at 1319 East Broadway to be used in the sale of the tract.

This concern has subdivided and sold out two tracts during the past year in Hollywood, and at the present time have thirteen houses under construction and a big 100-foot market building on Vermont avenue, and plans drawn for a fine large picture theater for Hollywood and Hillhurst corner, east Hollywood.

Frocks for Small Girls

To the charm of simplicity is added the daintiness of color in fascinating little frocks for the very small girl. They are of pink or yellow dotted swiss, put together with the finest of entre-deux, and finished about the sleeves, neck and hem with white footings.

ANNOUNCEMENT

We are pleased to announce that we have recently purchased the lease of M. Dent on the Bell Service Station at Colorado Boulevard and Delaware avenue, Eagle Rock, and are prepared to take care of your needs in anything you may want in our line of gas, oils and accessories. We are the only service station in Eagle Rock that distributes

Puente Gas

"THE GAS WITH THE PUNCH"

In order to be able to give an even better service than that extended in the past we have added a full line of SIERRA REFINING CO. Gas and Oils, a high grade product.

The patronage afforded this station in the past is duly appreciated. We hope to continue to merit your trade and will use our best efforts in taking care of your oil, gas and accessory wants.

Miss May McAvoy and Mr. Jack Mulhall Will Present Two Fine Mahogany Console Victrolas Sunday, January 7th, at

"CAHUENGA PARK"

With New Year's Greetings of Bundy & Albright

This incurs no obligation on your part—simply stop at the tract and register before 3 p. m. Sunday. An investment at "Cahuenga Park" has none of the usual risk of real estate speculation, for the actual production of the land will more than pay for it in a short time, yet the certainty of a city springing up at this point insures phenomenal increases in values.

Prosperous Small Farms

"Cahuenga Park" is founded on a fundamentally sound basis, for it is a self-contained unit of a city surrounded by a prosperous community of small farms. Now is the time to get in on the ground floor and make money both ways.

See the building activity already started—many homes already under construction.

Modern Improvements

Just imagine the joy of a highly profitable little farm homestead, with city water, gas, electricity, surfaced

Free Band Concert Sunday, Hollywood American Legion Band. Free 1923 Date Books to Adult Visitors.

Thos. C. Bundy & Co. Broadway 8388

Merchants National Bank Building

streets and curbs—only a few minutes from stores, schools, churches and theaters, and within 35 minutes' ride from the center of Los Angeles.

Free Victrolas

We are going to give away two beautiful Mahogany Console Victrolas Sunday, absolutely free. Miss May McAvoy and Mr. Jack Mulhall, the famous motion picture stars, will make the presentations in person. Every visitor at the tract will have an equal chance to win, whether interested in lots or not. All you need to do is to register at the tract office, and be on the tract if you are the lucky person.

Easy to Reach

Do not fail to come. Drive out through Cahuenga Pass on Ventura Boulevard, past the Hollywood Country Club to Sherman Way. Look for the big balloon.

Additional Attractions

In case of rain, presentation will be postponed till next Sunday.

NOT EVERY MOTORIST KNOWS HOW TO EFFECT 'CURE' WHEN CAR BECOMES STUCK IN THE MUD; IT'S A TRICK

When the Rear Wheels Sink to the Hubs, Keep Cool; Apply the Suggestions Here Given—They Seldom Fail

There is nothing quite so trying to a fellow's religion as to have the motor truck stuck in the mud or sand in some out of the way place, especially when the bus itself is working "like a top," as they say. There may be power to burn but it does no good so long as the wheels will not take hold. Few drivers realize, apparently, that the slower the wheel revolves the more traction it has, so when they get stuck in a hole they simply "throw 'er in low" and race the motor, thereby shortening the life of both the motor and the tires. When this fails, second is tried, and so on. The effect is usually that a deep hole is dug into which the wheel or wheels sink, thereby adding to the trouble. However, if the motorist keeps cool and exercises a fair amount of common sense it is generally possible for the truck to once more be running on perfectly solid ground before a great while and without a great amount of trouble.

EXCITING TRIP TO OPEN ROAD FOR MOTORISTS

The experiences of C. W. Niemeyer and Frank Silverthorne, pilots of the Edmonton Automobile club's pathfinder car, in blazing a trail from Edmonton to Vancouver, would furnish the scenario for a five-reel thundering thriller. They opened a pathway between these two cities of the Pacific Northwest, never before traversed by automobile, that, with the expenditure of a very small amount, will make a permanent and pleasant trail.

The two daring explorers encountered muskies, burned bridges, rock slides, grizzly bears, railroad trains, windstorms and furious rains.

Outfitted with picks, shovels, axes, hammers, four 10-inch 12-foot planks, several shorter pieces, a complete set of tools, spare parts, two spare tires, 50 gallons of gasoline and six quarts of oil, plus two men and their baggage, a total weight of 1800 pounds, in addition to the equal weight of the car itself.

They made the entire run on 41 gallons of gasoline and six quarts of oil, traversing a route that covered 1000 miles, including active railroads, tote roads and the Pacific highway. They brushed and built miles of roads, constructed 31 bridges, some of which were good enough to become permanent structures; killed a 14-foot grizzly bear, drove the car on the railroad tracks around curves and along precipices where the variation of a hair meant a plunge hundreds of feet to instant death.

They cut their way through a mass of fallen timber blown down by heavy windstorms near Tete Jaune Cache. At another point they led a trail through a river to get back on the route. Every where they left a passable trail behind them.

But they do record one narrow squeak when, as they entered a tunnel, not having been notified of an extra train being on the line. Just as they reached the entrance a train belched out on them. The driver swung off to the right against a pile of rocks as the train whizzed by. The pathfinders resumed their journey down the tracks as if their escape was a part of their daily life.

WASHINGTON LICENSES
Although the city of Washington in some places extends across the boundary line, residents are required to obtain license tags of both the District of Columbia and Maryland.

TRANSCONTINENTAL AUTOISTS TO BE TAXED

For the convenience of "tin can" tourists, a bill is now pending before congress, providing a special tax on automobiles which are engaged in interstate travel. This federal license tag would be issued annually, and attached to the regular state tag. It would take the place of all special registrations required by various states. The price would be 40 cents per horsepower, with a minimum of \$5 on any vehicle. Ninety per cent of this would go into the federal treasury.

CAR OWNERS ARE BEST CITIZENS, SAYS CAPPER

Tribute to the high standing which motorists of the United States enjoy in their respective communities is paid by Senator Arthur Capper of Kansas, in a communication received from him by the National Motorists Association.

For many years a close student of highway problems, of motoring questions, and of other activities in which the automobile figures, the views of Senator Capper are of particular interest and value.

Senator Capper's letter is as follows: "Mr. Raymond Beck, Field Secretary, National Motorists Association, Washington, D. C.

"Dear Mr. Beck: "Answering your inquiry of the 19th instant, will say that the owners of motor cars are representative of the highest type of our citizenship. I do not know of any other class of citizens who are more considerate of the rights of others.

"It is true that there are motor accidents, sometimes resulting in serious injury or loss of life, but I am confident that a very great majority of such cases may be traced to a comparatively small number of careless drivers; and certainly the lack of care on the part of the few should not be permitted to reflect on the conduct of the great army of motorists generally.

"Taking into account the millions of automobiles now operated, I think the comparatively few accidents speak well for the care and judgment exercised by drivers.

"Very respectfully, (signed) "ARTHUR CAPPER."

OIL BUSINESS IS 64 YEARS OLD NOW

It's really not so long ago that the oil industry dragged itself out of the earth and made itself known to the world. This year is celebrated its sixty-fourth birthday.

It was born in Titusville, Pa., in 1859, where the first well was sunk. This well, which is still a lucrative producer, is not over sixteen miles from Oil City.

The tremendous growth of the oil industry has, in a general way, been made known to everyone. It is a remarkable fact with all the colossal development of petroleum and its infinite number of uses that the highest type of lubricating oils should still originate from this very region where the first production occurred.

There are two main reasons why this should be so. The first is that the origin of safe lubrication is in the crude from which it is refined. The highest type of lubrication cannot be extracted from a crude which does not contain the highest lubricating qualities. Pennsylvania crudes are of paraffin base and are recognized by unbiased authorities as the best known source for lubricating oils.

Plans are under consideration in Massachusetts to provide motor camping sites along three of the main highways of approach to Boston. The camps will be located upon healthful sites, and care will be taken to provide for drainage and healthful sanitary conditions generally. Water will have to be supplied and probably some arrangement to aid the campers in preparing their meals.

Late Timing Causes Heating

If you have trouble with your motor overheating, your timing may be caused by late timing, which would also account for poor pickup. The blue smoke from the breather pipe is merely vapor coming from the hot oil, and is nothing to worry about. The knock you notice might be caused from carbon or from high not contain the highest lubricating qualities. Regarding your cylinders, will not eliminate your heating troubles.

IMMENSE AMOUNT PAID FOR TRUCKS IN 1922

One billion dollars were spent in 1922 for motor trucks and motor truck equipment, according to a prominent authority on the subject, who takes his figures from a late compilation of one of the leading statistical agencies of the country.

Commercial cars built during last year have reached a total value in excess of \$250,000,000. More than \$175,000,000 were spent for tires used for replacement; gasoline consumed by motor trucks cost \$250,000,000; more; lubricating oils, \$37,000,000; special bodies, \$60,000,000; parts replacements and supplies, \$73,000,000; special equipment claimed, \$15,000,000; and labor, including overhauling and repairing, \$150,000,000.

These figures show that it cost as much for gasoline to keep all these trucks running during the year as it did to manufacture them. The quantity figures approximately one billion two hundred million gallons.

There are close to 5,000,000 tires being used on trucks costing nearly \$200,000,000, to say nothing of the wages paid to the drivers, and the profits made by the operators of the huge truck fleets, and the quantity of things transported by this modern mode of transportation.

One billion dollars for motor transportation for 1922, and the ball just started rolling. What will be spent ten years hence, including highway construction contemplated to accommodate the huge increase in cross-country travel?

A Few Things Worth Remembering

"The highways are the arteries of the nation." A case where a little hardening of the arteries wouldn't do any harm, in some instances.

Check up your battery regularly to see that the "juice" is not fermenting.

If a cylinder gets hot, nine times out of ten it's because it was slapped by the piston.

If you're in great difficulty and can't seem to help yourself, let a little air out of the left front tire. That'll make it pretty soft for you.

Always carry tire cement. When everything else is gone, it'll stick to you.

The old fashioned girl who used to thrill at taking the reins while Henry lighted his pipe, now has a daughter who can leave the motorcycle cops swallowing dust and cuss words every time she takes the Fearless Flyer out of the garage.

For a dark spot on the upholstery, use electricity. It'll make the spotlight.

If your motor starts knocking, make it plain that you don't favor such business methods.

When you find that your gasoline has been "taken in," check up on the vacuum system, too. It's an awful sucker.

If your front wheel is broke, it's been rimmed. Look for the fellow the wheel spoke to last.

If anything squeals on you, suspect the fan at once. It's altogether too windy and always blowing about something or other.

If your generator won't run, let the tire carrier.

Don't put too much alcohol in the water. It goes right to the cylinder's head.

Accidents Caused By "Cutting In"

When overtaking another automobile on the road, pass to the left and do not pull over to the right until entirely clear of the car. The purpose of this is to prevent this dangerous practice of "cutting in," which has been the cause of many accidents.

NEW AUTO DOPE IS FOUND BY CHEMIST

For many years the dream of the automobile alchemists has been the discovery of some agent that would stop engines from knocking and increase the power and economy of gasoline. Such an agent would not only give greater mileage for a given quantity of fuel, but it would diminish carbonization, do away with crankcase dilution and other ills that have inevitably followed the necessary lowering of the quality of motor car fuel. Discovery of this element would enable the production of high-compression engines, regardless of the quality of gasoline used.

So many years passed without any real progress being made that most people considered the whole problem impossible of solution. To add to the confusion, many dishonest operators entered the field, claiming to have discovered the secret and marketing products for which they made extravagant claims. Government departments even took the trouble to warn motorists not to be fooled by fuel adulterants, as none of those, on the market, under searching tests, revealed the slightest value. So the idea became certainty in the minds of most motoring enthusiasts that doping fuel to get better service was an unrealizable dream.

And now comes the announcement, backed by the indorsement of no less an authority than the Society of Automotive Engineers, that this long-sought substance has been discovered, is actually in existence and can be manufactured at a cost which makes it a commercial possibility. When we say that the new fuel dope was discovered in the research department of General Motors, we place a further stamp of actuality upon it, and finally name it tetra ethyl lead, which being interpreted means alcohol lead.

When mixed with gasoline in proportions of a cubic centimeter to a gallon of gas, this new product eliminates knocking, caused by poor fuel. It will not take out a bearing or wrist pin knock, but it causes a pin knock, which is caused by poor-quality fuel, disappears. This new product will even eliminate knocking from violent overheating and glowing carbon, if it is used in sufficient quantity.

But this is only the beginning of the usefulness of the new agent. Present-day engines run at 60, 65 or 70 pounds compression ratio of 4 1/2 to 1. The automobile engineers are anxious to use compression ratios of 7 to 7 1/2 to 1, corresponding to 100 to 120 pounds compression. This would mean an enormous advance in fuel economy, in power and a lessening of dilution and other troubles. This new product, generally used, would enable the engineers to get this increased compression.

It is planned by the producers of this new compound to get production which will enable them to sell the fuel producers, for mixing with the gasoline at the best of the operations. Thus the fuel already "doped" will go to the retailers and motorists may obtain it from the pumps exactly as they do present grades. The cost of the anti-knock compound will add two cents to the retail price per gallon of gasoline. It is important that the distribution of the "doped" fuel be obtained, because without this the production of high-compression engines would be impossible. When production and distribution of the new compound are assured the automobile engineers will be able to proceed with developments that they have always longed to make, but which low-quality fuel has always denied them. This will give us a motor car embodying an efficiency and economy beyond our present understanding. It will mark a new era in motor car development.

Here's Good Polish for Metal and Glass

A good glass and metal polish is made by mixing one part of wheat flour with five parts of potter's clay. Apply with a damp woolen cloth. This mixture is without equal for removing tar, grease, paint and other stains from all glasses.

In cold weather it's well to use longer hose, heavier seat covers, hood, muffler and boots.

If you find you are carrying an overload, throw out the clutch.

Don't worry about body rumbling. A little castor oil will fix that.

If your axle is full floating, you can remedy this by draining out all the lubricant. Then it can't float—long.

If your brakes are dragging, tie them up with the brake bands.

A staccato, rattling noise may be caused by something pounding on your brake drum.

If your generator is dragging, tie them up with the brake bands.

A staccato, rattling noise may be caused by something pounding on your brake drum.

If your axle is full floating, you can remedy this by draining out all the lubricant. Then it can't float—long.

In cold weather it's well to use longer hose, heavier seat covers, hood, muffler and boots.

If you find you are carrying an overload, throw out the clutch.

Don't worry about body rumbling. A little castor oil will fix that.

SOME THINGS YOU DID NOT KNOW ABOUT MOTORS

Baroness D'Avanzo, who has competed in many European automobile races, will be the only woman to compete in the great spring sweepstakes at Indianapolis, Ind.

For "getting hit" by an automobile, William Berclivick of Kenmore, O., was fined \$5 and costs. It was found that Berclivick caused the accident, and the driver was exonerated.

Tests in Europe of various gases as automobile tire fillers have shown that nitrogen will keep a tire hard for thousands of miles of use, while oxygen causes the rubber to deteriorate rapidly.

Italy is planning for the construction of a giant highway between Milan and the Italian lake district for the exclusive use of passenger automobiles and buses. The road is to be completed in 1923.

In Paris a great part of the laboring class goes to work in motor buses which serve all sections of the city. First class passengers sit in the front, while those who pay the lesser second class fare ride in the rear.

HEED FIRE BELL, MR. MOTORIST

Fire! Clang, rumble, bump, whirr. What is the motorist going to do during a fire run?

When approaching a fire station every motorist should slow down, and be sure that he is safe before passing the entrance.

In heavy traffic, when the fire sirens and gongs are heard, no matter from where they seem to come, the motorist should pull as far over to the right as possible and stop until he is sure the engines have passed out of his immediate driving range.

Fire trucks are ponderous contraptions that are naturally hard to whirl through the streets. They cannot be serpentine through traffic, and that is the reason why they must be given full right of way over everything.

KEEP BRAKES IN GOOD SHAPE ALWAYS

There is far too great a tendency on the part of the average automobile driver to take a chance. We are all like that to some extent. When we coast down a hill we are willing to let chance decide whether or not there is a car coming, and sometimes the goddess of chance plays a mean trick and there is trouble sure to follow.

There is no reason why the average motorist should be in such a hurry that he cannot drive so that the car is under control at all times.

Good brakes, of course, are the best safety devices that you can have on your automobile. If you try to stop your car with poor brakes you may underestimate the braking power and go too far and strike something. Brakes should be tested all the time. It is a mighty poor driver who does not know whether the brakes on his car are good or not.

The injury entailed to the tires by this condition is considerable.

Laughs From Gasoline Alley

If your brakes are dragging, tie them up with the brake bands.

A staccato, rattling noise may be caused by something pounding on your brake drum.

If your axle is full floating, you can remedy this by draining out all the lubricant. Then it can't float—long.

In cold weather it's well to use longer hose, heavier seat covers, hood, muffler and boots.

If you find you are carrying an overload, throw out the clutch.

Don't worry about body rumbling. A little castor oil will fix that.

SIGNPOSTING CREW OF CLUB IS BUSY

Winter signposting is at its height now throughout this part of the state by the signposting department of the Automobile Club of Southern California, in preparation for the arrival of thousands of visiting cars in the spring months.

Five trucks of the club are now engaged in various counties of the southern part of the state putting up new signs and renewing the signs which have been weather-worn or defaced by pot hunters who think that a road sign is put up for a target and not for a direction marker. Work is to start early in the year on the re-signing of the inland route as far north as the Fresno county line.

The Automobile club has established a national record in signposting activity, now maintaining 93,749 signs in Southern California and on transcontinental routes leading to this section of America. Included in this vast number of signs are 2,000 safety warning signs and 100 electric flashing signals throughout this territory.

During the rainy season in Southern California one of the biggest tasks undertaken by the club is the erection of temporary route signs on roads where detours are necessary or storm damage has occurred. The Southern California organization has put up approximately 12,000 temporary signs this year.

If all the signs now maintained by the club were laid end to end they would cover a distance of 219 miles, not including the posts. The signs are now in the making for the re-signing of the coast route from Los Angeles to the Monterey county line. In the southern part of Nevada and in the desert region of Death Valley, the roads have been signed by the club and wherever signs are not found, motorists may know that it is not advisable to travel.

DON'T GUESS—KNOW YOUR MOTOR NUMBER

Only about thirty one of every hundred auto owners know their motor numbers, declare officials of the Automobile Club of Southern California.

Out of five autos stolen here in one day, only two of the owners were able to give the police the state license numbers of their cars. The other three "couldn't remember."

Learn your license numbers, warns the Auto Club, if you want to recover your car after it is stolen. A filing system is available at the club headquarters for all "forgetful" motorists who can't remember their numbers.

You can file all necessary information to be used by club detectives with the theft bureau, and if your car is stolen all you will have to do is to phone in your name and the club will do the rest. But you better learn your number, anyway, say the officials.

Keep Tires Away From Curbing

Even the most skillful and prudent of motorists will occasionally drive too near the curb, it is said, and find when he goes to drive away that he cannot turn his wheels without scraping them against the curb and seriously injuring them.

The injury entailed to the tires by this condition is considerable.

PATROLS BEAT IN AUTO

Police Sergeant John W. Greene of Washington, D. C., was found patrolling his beat by riding around in his automobile. Greene is said to be worth half a million dollars.

If your motor is missing, take a look around the propeller shaft. There's a couple of tough jobs down that way.

FACTS ABOUT AUTO REGISTRATION GIVEN

In conjunction with the Division of Motor Vehicles, the Automobile Club of Southern California is making arrangements for the renewal of automobile licenses for its members along lines which promise to give its members the least possible annoyance and a better service than has ever been provided in past years. The details of the plan will be given due publicity by the State Division of Motor Vehicles and the Automobile club at a later date.

Preparatory to the renewal, it is suggested at this time that all motorists inspect their certificates of registration. If your certificate has been lost, destroyed or so mutilated that it cannot be read, immediately go to one of our offices or one of the branches of the Division of Motor Vehicles or send application, with a fee of 50 cents, to the Sacramento office of the department and procure a duplicate.

If you are not the legal owner please see to it that the legal owner's name and address is indorsed in the space provided for this purpose on the bottom line of the certificate so that it may be recorded on the new certificate for 1923.

Your 1922 certificate bears the name of legal owner whose equipment in your car has expired, have sign the certificate on the "Indorsement of transfer" side and the 1923 certificate will be issued in your name.

If you have changed your address during the past year without having that fact so noted on your certificate of registration, kindly make the change thereon.

If you have been touring in the state of California and your car was registered in another state and you contemplate taking out a 1923 registration in California procure a certificate of registration from the state from when you came and be prepared to prove ownership of your machine when application is requested for 1923 registration.

Members residing in the branch territories of the club are urged to file their applications. The branch offices for 1923 license plates early in January, as license applications filed at the branch offices will have to be forwarded club headquarters to be rated and checked for clearance. While applications can be filed in branch offices during January, no applications will be accepted at club headquarters at Los Angeles early in February.

Members residing in branch territories are advised to file their applications early in January to avoid delays and to enable employees to render prompt service.

TRY THESE THINGS WHEN "THERMO" DROPS

Have carburetor cleaned and adjusted for winter driving.

Blow out heating chamber passages frequently to eliminate carbon.

Clean out carbon and grime valves.

Blow out carburetor and gas line lines to eliminate water and sediment.

Drain and flush out transmission and rear axle and refill with lubricant suitable to temperature range of your locality.

Keep storage battery fully charged.

Add distilled water to battery twice a month.

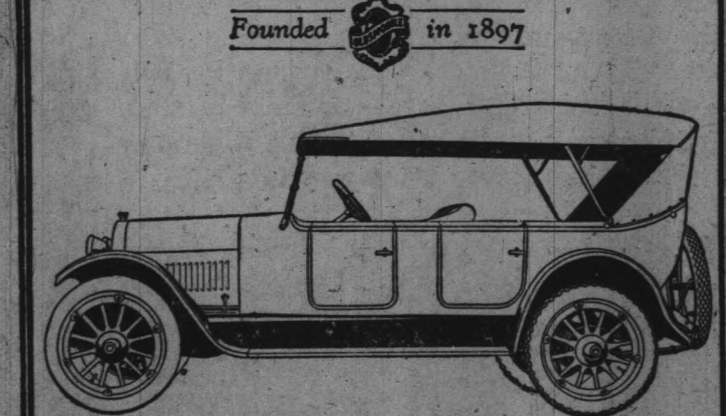

Change oil every 500 miles driving.

If your motor is missing, take a look around the propeller shaft. There's a couple of tough jobs down that way.

I Defy Anyone to Show Another Syndicate in Center of Signal Hill That Has A Smaller Capitalization

—It is apparent right now that this BEMCO No. 1 Syndicate of mine will be, perhaps, the greatest profit-payer in Signal Hill, California's wonder oil field.

—You have heard a lot about low-capitalized, actual cost syndicates. Some of them are actual cost and some of them are not. When I say that BEMCO is an actual cost proposition, by Golly, I mean ACTUAL COST. I mean that it is going to cost me \$125,000 as near as I can figure, to drill and equip this well and pay for this lease. I paid \$7,500 for the lease (it is worth \$15,000 today); my big, strong, redoubled derrick cost me \$5,150; I have signed a \$100,000 Turnkey drilling contract with that master driller, Jack McKeon, which includes the furnishing of everything, and Mr. McKeon gives a surety bond guaranteeing the fulfillment of the contract. When you come in with me on this syndicate you will share on a Signal Hill gusher on the smallest capitalization that this field has ever known since its success was established. Think it over a little bit. Does it stand to reason that a syndicate with a \$175,000, \$250,000 or \$350,000 worth of outstanding stock can pay off as much as one with only \$125,000? You know darn well what the answer is. It is up to you to decide whether you want to be a big fish in a little puddle, or a little fish in a big one.

—I'm going to leave it to you if this isn't the cleanest cut, squarest proposition you have ever seen. I do not want a lot of Bombast or Bushwa about me or BEMCO No. 1—but I am telling you some straight facts right here, in Plain English, that you will do well to listen to if you have any idea of making money out of oil, and I want to tell you that all the promotion money in this syndicate—all the watered stock in it—would not buy a toy balloon down at Woolworth's 5c and 10c store. This deal is as clean as a hound's tooth.

—Another thing, BEMCO No. 1 is not located down in Texas, Oklahoma or Louisiana, but right here, near you, at Signal Hill, where you can INVESTIGATE our claims and see for yourself what an opportunity is offered you. Just phone and we will call and give you auto ride to lease free. Cars leave Glendale 11:00 a. m. daily. Good eats included, served 12:30. Phone today and make arrangements to go to our lease.

—If you want to make the trip in your own car Sunday, go by the way of the Milk Sanitarium on Bixby Heights, American Avenue, one block, then turn toward Long Beach, from this point to Center street, where you will see the big BEMCO sign. Be there by 12:30 for lunch.

LAKE LEVEL IS BETERBILT 'BAT' LIVE TOPIC IN MIDWEST

MADISON, Wis., Jan. 6.—Six inches lower water level on Lake Michigan may cost the harbor cities of Wisconsin and Michigan millions of dollars.

Sheboygan, Milwaukee and other lake ports have been responsible through their complaints that the enormous amount of water taken out of the lake by the Chicago Drainage canal would cost them large amounts of money, or the virtual ruination of their harbor, a suit now under advisement in the United States supreme court started by the state of Wisconsin against the state of Illinois.

The suit was started by Attorney-General W. J. Morgan with the consent of the Wisconsin legislature in 1921, and is similar to several suits started by the federal government against Illinois. Arguments in the case are scheduled for next spring.

Now Governor John J. Blaine (Wisconsin) who refused consent to the starting of the case, has declared that the suit between the states is a basis for bad feeling and interferes seriously with the proposed waterway from the lakes to the gulf, which is bound up inextricably with Wisconsin's cherished dream, the St. Lawrence waterway from the Lakes to the Atlantic.

Wisconsin's Dream
Governor Blaine also suggests a joint commission from the two states to settle the matter. His chances of success in withdrawing the case from the superior court by action of the legislature are bettered by the fact that both houses of the legislature have majorities elected on the LaFollette-Blaine platform.

Meanwhile, several of the harbor cities are demanding that the suit be carried through, basing their statement of need on the assertion that the drainage canal actually has lowered the level of the lake and caused many thousands of dollars expense to them for dredging already.

Former Attorney-General Morgan, who went out of office January 1, says that the Wisconsin cities' grievance is a real one, and that Chicago should be compelled to dispose of her sewage by a purifying plant whereby the water could be returned to the lake without pollution, as many other cities are doing.

The real solution of the whole matter according to Morgan, would be an act of congress definitely deciding the water level of the Great Lakes within certain limits. Such a bill may be introduced soon by one of Wisconsin's congressmen, the only obstacle being that the congressmen of the lakes region are now trying to unite on the St. Lawrence canal against the determined opposition of the eastern districts of the country.

So the dredge crews keep working away.

C. L. SMITH, 'CHEV.' DEALER, STEPS FORWARD

C. L. Smith, the enterprising Chevrolet dealer in Glendale, has just taken another step forward. This consists of the purchase of a lot 50x160 feet on San Fernando road, just north of the Los Feliz road, upon which Mr. Smith intends within a few days to begin the construction of a dandy new branch home for his car. For the past several weeks Mr. Smith has maintained a branch in South Glendale. Since establishing it there business has been so good that Mr. Smith felt that the only thing he could do was to build a branch home for his trustworthy car.

The building that will be erected by Mr. Smith will cost more than \$15,000. It will consist of brick and will be modern in every sense of the word.

The enterprising spirit of Mr. Smith is to be commended. He says that to stand still in a business way is to go backward, and there is nothing like that in his family.

Just about one car of Chevrolet automobiles per day are being received by the local "Chevy" agency. These cars are going out as rapidly as they are being received, which shows that there is something doing all the time at the local Chevrolet agency. More warehouse room is needed and it is expected that the South Glendale store will furnish storage space for a small percentage of the cars that are expected to arrive soon for the spring trade.

Smith is a go-getter, as they say.

HOW TO GET HIGHER SPEED
The first step necessary to develop higher speed in a motor is to lighten all reciprocating parts such as pistons and connecting rods. Get perfect carburetion and ignition.

FOR PROPER COOLING
To secure efficient cooling it is necessary that the water be kept circulating freely through the cooling system and that the air be kept flowing through the radiator.

"I can truly say, madam," began the educated-appearing prisoner, "that I shall actually regret the day my sentence expires and I leave these walls."

"Ah," breathed the sympathetic visitor. "I had heard that this was a model prison but I never dreamed that it instilled such gratitude and depth of feeling in its inmates. And how much longer does your sentence run, my poor man?"

"Life, ma'am."

MAKES BOW HERE

The Beterbilt dry battery has made its bow to the motoring public of Glendale.

Concerning this battery, H. N. Landon, local representative for the Beterbilt Dry Battery Service, 203 West Broadway, says:

"Ever since automobiles have come into general use, one of the vulnerable points has been the battery, which has required frequent filling with distilled water; otherwise, short life to the battery and inconvenience to the driver.

"The invention of the Beterbilt battery overcomes this fault. A better battery, with longer life and absolutely no attention or filling.

"The Beterbilt battery is now on the market at a lower cost than most batteries. The price is \$22.50 for the 11-plate size, and it carries an unconditional guarantee of two years."

By its special process this firm will convert the ordinary wet battery into a dry battery at a cost of \$3.50.

"Don't wait until your battery goes bad," says Mr. Landon. "Convert it into a dry battery and prolong its life at least six months to a year. It will give you better service and the satisfaction of being able to forget the periodical filling. We do the work while you wait, and give you a six-months guarantee."

FANGMAN SAYS NO RAISE FOR WEEK

Notwithstanding the fact that tire prices have been advancing during the past several weeks, A. C. Fangman, proprietor of the Cut Rate Tire store, 212 West Broadway, says that his cut-rate prices on the standard make casing he is now handling will continue for at least one week longer. Mr. Fangman is retaining these prices in order that his many customers may have the advantage of the old rates. He will be compelled to make a raise in prices at the end of the period stated.

A number of the standard makes of tires are handled by Mr. Fangman. Among these are Virginian, Miller, United States, Royal Cord, Oldfield, Inland, Goodrich Silver-town cord and American.

long its life at least six months to a year. It will give you better service and the satisfaction of being able to forget the periodical filling. We do the work while you wait, and give you a six-months guarantee."

FIX TIRES WHILE CUTS ARE SMALL

Small cuts in tires, not over a half inch, may be repaired with a tread filler. For longer cuts, especially when the face of the fabric is laid bare, vulcanization is essential.

Every cut in the tread should be thoroughly cleaned out before being repaired. A cloth soaked in gasoline may be used for wiping out the cut, and then a bit of cloth on the end of a screwdriver may be used for removing any dirt lurking inside.

Next, a coat of cement should be applied to the sides and bottom of the cuts. After this has dried, a second coat should be applied, and when this is thoroughly dry, the filler should be inserted. A piece of filler may be worked into the cut with the blade of a knife, the mass being leveled off with the surface of the cut. If the tire has to be used immediately, a small piece of cloth or paper should be cemented over the filler so that it will not pick up dirt from the road.

A motorcycle with a limousine sidecar body, holding three passengers, is operated in London. The vehicle is equipped with a steering wheel instead of handlebars.

HUNTER SAYS 'BIZ' SURELY IS GOOD

"If 1923 continues as it has started out, I will certainly be glad," said C. H. Hunter, 208-10 West Broadway, local agent for the Oldsmobile. "I have had all kinds of inquiries for Oldsmobiles since the opening of the new year, and at this time the prospects for the new year are exceedingly bright."

A delivery of a spanking new Oldsmobile touring four was made by Mr. Hunter, Friday, to S. N. Gray of 218 South Louise street, and the new owner is more than pleased with his recent purchase.

"That's the way they all talk," says Mr. Hunter.

G. H. Custin, formerly vice-president of the Ohio Oldsmobile distributing concern of Cleveland, is now on the sales end of the local Olds agency. Mr. Custin knows the Olds from radiator to gas tank, and he is willing to impart that knowledge to the Oldsmobile and prospective Oldsmobiles of Glendale.

Mr. Custin will soon move to Glendale. He is in love with this city and intends to make this his future home.

CADILLAC SALES DON'T GET 'JAZZY' STAR MOTOR IS GO UP AS PRICE WITH MOTOR, GOES DOWN WARNS CLUB 'SOME' POWER PLANT

Country-wide Response to Recent Announcement of Reductions

The immediate and country-wide response of the motoring public to the recent announcement of substantially lower prices on all models of Cadillac cars has been even greater than was anticipated at the factory, according to Lynn McNaughton, general sales manager of the Cadillac Motor Car company.

"News of the reduction effective December 1 reached the press of the country on the morning of November 24, and began to show immediate results," said Mr. McNaughton. "Using the week ending November 25 as a base, reports from distributors from all parts of the country show an increase in sales of 22 per cent for the week ending December 2, and of 90 per cent for the week ending December 9. Deliveries in the first week mounted 60 per cent, and in the second week better than 150 per cent."

"Our distributors have found that this reduction has opened a vast field among prospective buyers who were evidently waiting for absolute assurance that motor car prices had reached rock bottom."

SOME INTERESTING MOTORING FACTS

One of the newest European passenger automobiles exhibited in this country cost \$25,000.

The United States is now producing more than three-fourths of the automobiles of the world.

Motor vehicle accident insurance rates are higher in New York City than anywhere else in the world.

With 410,000 automobiles in Iowa, motorists in the state are spending \$311,641,000 annually for automobile insurance.

A garage in Denver, Colo., has equipped a motor truck to supply compressed air, as well as gasoline and oil, to its customers.

Taxis in Mexico City, Mexico, represent every hue of the rainbow. The colors include yellow, blue, white, brown, green and variegated.

The proposal to require all automobile drivers in Washington, D. C., to be bonded in the sum of \$3000 has been abandoned as impractical.

The world's record non-stop motor truck run was recently made when a car was driven from Chicago, Ill., to Washington, D. C., in 37 hours and 34 minutes.

Does the title "Beautiful and Dumb," made famous by F. Scott Fitzgerald and a certain Los Angeles movie actor, apply to the women drivers of this section of the state?

Officials of the Automobile Club of Southern California declare that the recent statement issued by Dr. Clyde B. Moore, psychologist at the University of Pittsburgh, that instances of people of from 25 to 35 years of age with a mentality of 7-year-old children, in charge of automobiles today is alarming, does not apply particularly to the southern counties of California.

Many authorities state that the "jazz age" has struck a large number of auto drivers, but Auto club officials say that the most of the accidents hereabouts are traceable to carelessness and recklessness rather than to plain jazz. However, the big club has no desire to see this part of the West inoculated with Eastern jazz germs, and so its safety bureau has just issued a warning to the motoring public to watch its step and not get funny with the throttle.

According to Dr. Moore, who gave army mental tests during the world war and who urges that applicants for drivers' licenses be subject to similar mental tests, his war records show many instances of men 25 to 35 years of age having the minds of very young children, trying to handle army motor trucks. "The number of such persons in charge of automobiles on city streets today should alarm us," states Dr. Moore in a recent report which has received widespread attention.

Automobile club officials representing the legal department of the organization are completing preparations at the present time for recommendations to protect motorists in the drafting of new motor vehicle laws at the 1923 meeting of the state legislature at Sacramento.

NEW DISTRIBUTION GUARD

An excellent method of protecting the coil and distributor from water is to cover this unit with a boot made from a short section of an inner tube. Close one end of the tube with tire cement and push the boot over the distributor. The wires leading from the electrical system can be inserted through holes in the top of the boot.

SOFTEN CONE CLUTCH

Castor oil or neatfoot oil is best for softening a leather cone clutch. First clean the leather and scrape the glazed surface; then apply the oil and allow it to penetrate the leather over night. Graphite and oil are used on metal to metal clutches.

The wonderful little motor in the new Star car, which is handled in Glendale by Dilley & Armstrong, 115 West Harvard street, is, according to the local agents, one of the most remarkable power plants ever placed in an automobile.

When going over the motor the many fundamental earmarks of excellence, simplicity, accessibility, elimination of unnecessary parts and the incorporation only of straightforward, proven mechanical principles which make this motor unique in its class, should be considered.

"The right hand side of this motor," said Mr. Dilley this morning, "shows the unusual features of the engine. The cylinders and crank case are cast in one block of gray iron, in which the pistons as well as the machining and grinding qualities are such as to make it exceptionally desirable when quality and long life are the predominating features in connection with a motor to be produced."

"The starter drives through teeth in the flywheel, which is made of semi-steel for strength. The size, weight and moment of inertia of the wheel is carefully calculated to balance the power impulses of the engine. Six steel bolts ground to a press-fit hold the flywheel to the crankshaft flange and keep it there."

"The starter is held in place by a simple yet positive arrangement. Loosening one bolt permits its removal. The lighting generator is attached to the chain case by three bolts. Chain adjustment is obtained by swinging the generator about one of the three bolts which acts as a pivot. Slots in the generator flange enable the adjustment to be made quickly and the generator to be locked permanently in place."

"The distributor is an integral part of the generator. The latter is provided with a through shaft which serves as a drive extension for the water pump. A flexible hose coupling connects the generator and the pump."

"The water pump is a centrifugal type and is bolted to the block. The manifolds and carburetor are mounted on the left hand side of the engine. The exhaust and intake manifolds are worked in together in such a way that the incoming gas is heated to an ideal temperature."

The Star motor is one of the L-head type and has a simple valve system. The removal cylinder head gives the utmost accessibility to the cylinders, pistons and valves.

"Removing the oil pan exposes the interior of the motor and makes instantly accessible all of the bearings."

"This motor is up to the minute from every angle. It has demonstrated that it will 'stand up' in the truest sense of the word."

ORCHARD COVER CROPS

Clean cultivation of orchards and cover crops, with their effect on fruit color and the general health of the trees, were discussed at the recent meeting of the State Horticultural Society of Washington by Professor O. M. Morris, head of the horticulture department of the State College of Washington.

First he told how orchardists in the irrigation regions had been devoted to clean cultivation, and secured splendid growth, rapid development and early fruit production by this means. The soil is, however, extremely low in humus, inclined to alkalinity, and rapidly depleted of its fertility under this clean cultivation. The extremely high coloring of the fruit should have been taken as a warning, he said. Shortly after the trees gave evidence of slowing up of growth abruptly, unsatisfactory color of foliage, and in many cases unsatisfactory development of the trees.

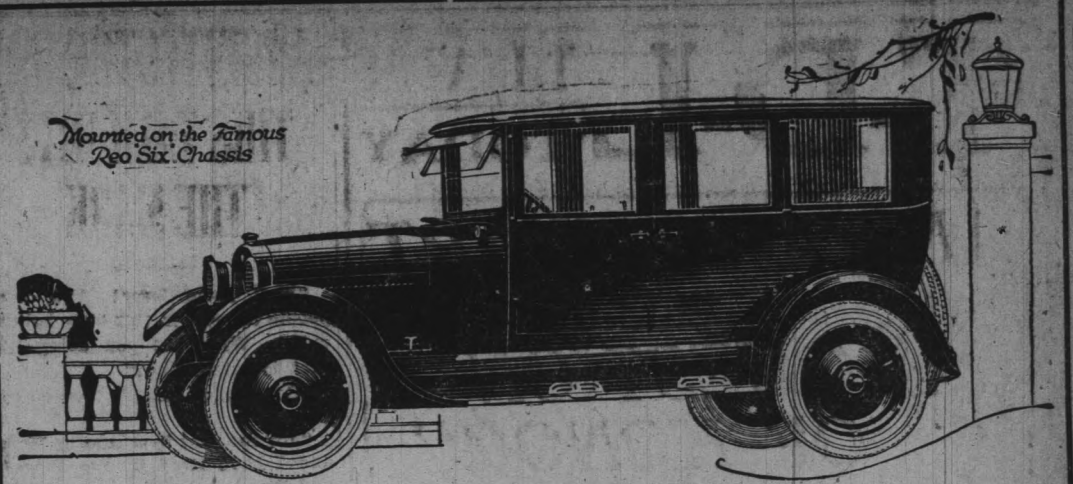

He told the effect on the heavier soils, which, being low in humus, under clean cultivation worked well in spring but in summer were dry, hard, almost impervious to water. Trees in such soil showed the effects of drought. The fruit was small and of poor quality. Orchardists, noticing these signs, tried commercial fertilizers and started cover crops. In run-down orchards there was a struggle between the trees and the cover crops for water and plant food from the soil. Some growers had to practically destroy their cover crop to save the trees. Others were fortunate enough to time the cover crop planting so they could let the struggle go through to a finish. After the crop had time to begin giving back to the soil, tree growth improved, and the orchards gradually came back to more normal condition. But the high color of the fruit did not return. That, it seemed, was a warning rather than a normal development.

FAST FLYING BIRDS

A study of how fast certain birds fly has been made by the Biological Survey of the department of agriculture. Certain kinds of hawks have a speed of 200 feet a second or about 136 miles an hour. This might be a suitable rate of speed for a racing airplane. The canvasback duck can fly from 60 to 70 miles an hour. The crow is the slowest of the birds studied as it only travels at the rate of 45 feet a second or 30 miles an hour. The common dove can reach a speed of 68 miles an hour but it usually travels much slower. Many of the northern ducks can fly at a speed of 88 to 98 miles an hour but generally fly at a slower rate of speed.

Beware of the man who says there isn't enough money in circulation to buy him. Sooner or later you will find him on the bargain counter.

Electrical signs are responsible for some bright remarks.

New REO 5-Passenger Sedan \$2160 HERE

Built and Priced to Establish a New High Standard of Sedan Value

ENDURING steel paneling covers a sturdy frame work of selected hardwood, braced with drop forgings and fitted to foil the ravages of time and travel.

The body interior is pleasingly attractive. The dignity of straight lines from front to rear is preserved; but the introduction of quiet curves serves to prevent any suggestion of severity.

Inherent good taste prevails in the low-hung body, in the disc steel wheels, in the modishly fashioned headlamps and innumerable other marks of refinement.

Window glass of unusual clearness silently slides in felt-lined channels; all except the rear window which rests in a setting of soft rubber. This is quietness pre-determined.

Inside is seen a true example of how eye-pleasing and body-resting comfort are completely embodied when master coach-builders do their best.

Enduring Beauty—Craftsman-built arm-chair Comfort—Costly Materials that look the part—down-to-the-minute Completeness—mind-resting Reliability. Where else will \$2160 buy as much motor car?

DIRECT TAXES

The War Department of the United States has made a comparison of six leading powers (mother countries) as regards amounts of direct taxation.

The United States, with \$4,000,000,000 in 1920, shows the largest volume of money raised by direct taxation, but while the United Kingdom is second on the list with \$3,213,918,000 in 1920, taxes per capita in the United Kingdom were \$71 as against \$38 in the United States.

In 1913 the United States raised

\$1,349,841,000, while the United Kingdom raised only \$379,192,000. France is third on the list, with \$1,220,422,000 in 1920, and \$188,670,000 in 1913.

In 1920 French taxes per capita were \$29. Italy raised \$484,500,000 in 1920, the per capita being \$13. In 1913 the amount was \$113,430,000.

Japan raised only \$170,526,000 in 1920 as against \$72,454,000 in 1913. The per capita in 1920 was \$3.

China is at the bottom of the list with a per capita for 1920 of only \$0.09, the amount raised being \$29.

133,000. The amount in 1913 was \$33,725,000.

A man has his reason and a woman has her beauty. Some people dispense sympathy because it doesn't cost anything.

Anyway, the obese female who has outgrown the corset habit looks comfortable.

Tact is the ability not to look solemn when a rich relative gets off an alleged joke.

A woman who speaks from experience says it is easier to manage a husband than a hired girl.

Beterbilt Dry Battery

\$22.50. with a Two-year Guarantee

Ever since automobiles have come into use, one of the vulnerable points has been the battery, which has required frequent filling with distilled water; otherwise short life to the battery and inconvenience to the driver.

The invention of the Beterbilt Dry Battery overcomes this fault. A better battery, with longer life, and absolutely NO ATTENTION OR FILLING.

The Beterbilt Dry Battery is now on the market at a lower cost than most batteries (\$22.50 for the ordinary size, 11 plate) with an unconditional guarantee of two years.

**We convert your present battery
to a dry battery for \$3.50**

Don't wait for your battery to go bad; converting it will prolong its life six months to a year, give you better service and the satisfaction of being able to forget the periodic filling.

We do the work while you wait and give you a six months guarantee. Drive around today and let us tell you about it. We can refer you to many present satisfied users in Glendale.

ARCHITECTURALLY THIS TALK HITS THE MARK

"Well, Anne Carey! You, of all people to meet in this busy holiday rush! What are you doing now that is interesting?"
"Something simply wonderful, Mary."

"For the past four months Henry and I have lived in one thought, and that is the building of our dear little home out in the Hollywood Hills, where the kiddies can play and we can have a real breathing space away from the bustle and noise of the city."

"How splendid for you to have your own home. But tell me, what kind of a house are you building?"
"It is a different kind, Mary, from most of the bungalow styles, for it is of the early Norman architecture—cottage type, with overhanging eaves, and the quaint casement windows that open out with little diamond shaped panes of glass in them."

"The fireplace is just charming, with windows on either side of it. It extends clear to the ceiling, and is made of plaster with an occasional tile in it here and there."

"We had a little niche hallowed out big enough for a clock or a bowl of flowers, and above it, inset a beautiful mountain scene that I feel sure we will never tire of and will always find restful."

"And what kind of furnishings does that type of house call for?"
"I do not wonder that you ask that question; for the peasant cottage of that day had very little furniture—benches, stools, rough trestle tables and beds, chests and open shelved cupboards on which were placed the dishes and pewter, for in those days the living-room, dining-room, kitchen and bedroom were all in one, called the hall."

"Of course, we have progressed to the point where we want the charm of the old days in its architecture, wrought iron and furniture influence, but added to that the comfort and beauty of today."

"How interesting! Do tell me something of what you are putting into your home!"

"The living-room floor is made of large sand colored bricks over which we will throw several Oriental rugs."

"In the front end of the room I am placing our piano, bookcases, desk and Victrola."

"And, since the room is very large, the other end of it will serve as a dining-room, and we are having a medium-sized drawboard table that will be used most of the time as a library table, and different kinds of chairs that will look well in the living-room and can be used around the table when a dining-room service is required."

"Against the end wall near the table we shall have an open shelved cupboard on which will be placed some of the old pewter and dishes I have fallen heir to."

"Anne, that will make a most charming setting."

"By the fireside I have insisted that Henry have a corner all his own, that will have in it a comfy overstuffed chair, a table beside the chair for magazines, books and papers (and he may have things on that table that I am not mentioning)."

And there came out a base-born man from the camp of the Philistines named Goliath, of Gath, whose height was six cubits and a span. And he had a helmet of brass upon his head and he was clothed with a coat of mail with scales. And the weight of his coat of mail was 5000 sicles of brass. And the staff of his spear was like a weaver's beam, and the head of his spear weighed 600 sicles of iron. And his armor-bearer went before him.

And standing, he cried out to the bands of Israel and said to them: "Choose out a man of you and let him come down and fight, hand to hand."

And it came to pass that David, a brave shepherd lad, was urged to go forth and battle with the mighty Goliath. But David, after taking a look at the man of six cubits and a span, answered, saying: "Where do you get that stuff? I might get hurt or recognized."

And when his people pressed for an explanation David said: "Listen. The best I could do would be to escape, and Goliath, having seen my face, would know me if we ever met again, and—well, you never can tell. Let us play it safe."

And when the people cried for the details of his plan David said: "There will be a meeting on the outskirts of the town at midnight. I will distribute white sheets and hoods. Then we shall make me Imperial Kleagle. We will send Goliath an anonymous letter in the morning, and if he doesn't leave these parts in a week we'll invite him to a masquerade, get him in a corner alone, and attack him in a mass formation and hide the body in a lake." And so it came to pass.

Jack the Giant Killer
Once upon a time there was a lad named Jack, whose home was terrorized by an enormous and blood-thirsty giant, who lived on the edge of a mountain. One day Jack spilled some beans, and a bean stalk grew up to the mountain top. Jack climbed the bean stalk and came to the giant's retreat. While

Foley's Friendly Fancies

JAMES W. FOLEY

TODAY
Don't wait till tomorrow—today is so fair. And the skies are so blue, and the spirit so rare. Of the whole waiting world, and the task is to do. So let us go forth now and see the thing through. Don't wait till tomorrow—the day may be cold. And the chance that is ours now may never unfold. Again and the tricks that our fortunes may play May leave us unfit, so let's do it today.

Don't wait till tomorrow—whatever it be. The time is right now, for the spirit is free. The kind heart is eager, the friend's waiting there. For the hand that is warm and the song on the air Tomorrow, who knows if tomorrow will see The chance today offers to you and to me. The friend may be gone on the highway away. Don't wait till tomorrow—let's do it today.

Don't wait till tomorrow—the gift that we share. The kind word and tender, the friendship so rare. The word of forgiveness, the greeting to send. The smile and the handclasp from friend to the friend; The praise we should utter, the note of good will. Tomorrow the lips that would speak may be still; Who knows when the roses will wither away. Don't wait till tomorrow—let's do it today.

AT THE THEATRES

BIG VAUDEVILLE, ANITA STEWART IN WEEK-END AT THE GLENDALE

There are five delightful acts included on the big new vaudeville bill that is booked to open at the Glendale theatre, Saturday, January 6. The first of these is the offering of Williams and Lee Duo billed as "Comedy Acrobats." They present a unique turn and carry their own scenery in which to stage it. Benton & Clarke are "The Fashion Plate Pair" who also carry special scenery. This team has been phenomenally popular because of the newness of their material and the clever manner in which they put it across the footlights. John McGinn is a "Monologist and a Songologist" with a line of chatter that surely will please the most particular. Wilbur & Spencer Sisters have a comedy, novelty jumping turn that is a perfect gem. The Stratford Comedy Four round out a very pleasing program.

The story of a gambler who always played fair except upon one occasion—when he resorted to the cunning in his fingers to save a life at stake, comes to the screen of the Glendale theatre tonight as a Universal special attraction starring Frank Mayo. It is "Caught Bluffing," by Jack Bechdolt.

The story is laid in the Klondike during the grand gold rush when the lid was off and prohibition a thing unheard of. From the snow-clad peaks down to the valley and the Oxford gambling house, "Caught Bluffing" is said to be flowing over with thrills of the kind that only Frank Mayo can furnish.

Sunday Program
A diverting comedy of modern marriage is the Goldwyn photoplay, adapted from a magazine story by Peter B. Kyne, "Brothers Under the Skin," which will be the attraction for three days, beginning on Sunday, at the Glendale theatre. Its thesis, that all men are brothers, when it becomes a question of marriage and a man's relations with his wife, no matter what their economic or social station in life, is one that permitted Mr. Kyne to weave a story about two New York households, one in a poverty-stricken flat, the other in a gilded Riverside drive apartment house, that lent itself to veracious comedy treatment.

he was talking to the giant's wife he heard the giant approaching, and roaring "I smell fresh meat!" And Jack, hiding in a closet, took one look at the giant, and, seeing he was a big guy, he fled from the retreat, slid down the bean stalk, and reported the matter to the local clan. The clan, after getting a good description of the giant, voted to drop the matter for lack of interest, and gave Jack a coat of tar for spilling the beans.

Robin Hood
Once there dwelt in Sherwood Forest a man named Robin Hood. He thought there were some great wrongs to be righted in the interest of the people. And he was about to buy himself a suit of green and a sword and start forth to battle evil and greed when he suddenly realized how damned silly it would be, especially since the Sheriff of Nottingham knew his face well. So he got into a nightgown and flour bag instead, and started to interest the neighbors. Eventually he became a grand wizard.

The Three Musketeers
Once upon a time there were three musketeers—Athos, Porthos, and Aramis. And they were joined by one D'Artagnan. They were reckless, daring men, who craved adventure. So they picked out certain places where it could be found, and after a hard membership drive at \$5 a head they recruited several thousand members. Called it D'Artagnan Klan No. 27, cleaned up a fortune selling them cotton cloth suits and hats, and moved on to the next town.

As yet the mirror has not been made that will enable man to see himself as others see him.

EDWARD STARK TO TELL OF NEW DAY HERE

Evangelist to Preach at Chamber of Commerce Sunday

"The present hour is a period pregnant with great events. It is a time of transition and change. The old order is in the winepress experience, and the world awaits the dawn of the new order," declared Edward Stark, who will speak at the chamber of commerce on Sunday.

"There is no pessimism in stating that we are living in an epoch of lowered ideals, weakened morale, license supplanting true freedom, lessened respect for law—an abnormal period."

"The World war of 1914 was followed quickly by the most tremendous crime wave ever known on earth. Profiteers have waxed bolder while wickedness in high political places has greatly increased."

"Many great scientists have forsaken the teachings of Jesus Christ, fully accepted Satan's first lie, and are now teaching the people their dead friends are alive, and that they can communicate with them. Inordinate affection among the sexes has led to the wrecking of many homes, insanity and murder. A great army of discontents roam the earth; while suicides, including children, amount to the hundreds of thousands."

"The world is torn with war, revolution and anarchy, while famine and pestilence stalk through the land. The leading statesmen of the nations are in distress and the people in perplexity and every where men's hearts are failing them for fear. It is indeed a time of trouble such as the world has never yet known; and there is more to follow."

"Why? The answer is—because the old world has ended. The new day is dawning. Christ's kingdom is here. Millions of people now on earth by heeding the message of the hour—'Repent Ye, for the Kingdom of Heaven is at Hand,' may pass from the thrall of Satan into the glorious liberty of the new kingdom."

You are invited to hear Mr. Edward Stark in the chamber of commerce auditorium, Glendale, Sunday, January 7, at 7:45 p. m. As usual no collection will be taken. All are welcome.

MAY BE STOLEN CARS
Suspicious looking cars left in the neighborhood for any length of time should be reported to the police. They may be stolen property.

FOR RESULTS—USE PRESS WANT ADS

Advertising Shortens the Road to Success

Do you doubt that a new hatter could spring up in New York and, with honest hats and brilliant advertising, in five years take its place abreast of the leaders of fifty years? It has been done.

Do you doubt that a new thought could arise in pencils, and, in two years, backed by good advertising, make a place for the pencil on the desks of the nation? That, too, has been done.

Do you doubt that a New York department store, in a bad year, could, largely through the improvement in its advertising, attract 110,000 new customers to its shop? That was done, last year.

A fine old business may consider advertising as a protection for today and insurance for tomorrow but to the young growing business it is a pair of seven league boots, which bring fame, friends and volume, years before their normal advent.
